## 1. CONFORMANCE STATEMENT OVERVIEW

Table 1-1 provides an overview of the network services supported by *Aplio*.

**Table 1-1  
NETWORK SERVICES**

| SOP Classes                                                | User of Service (SCU) | Provider of Service (SCP) |
|------------------------------------------------------------|-----------------------|---------------------------|
| <b>Transfer</b>                                            |                       |                           |
| Secondary Capture Image Storage                            | Yes                   | Yes                       |
| Ultrasound Image Storage                                   | Yes                   | Yes                       |
| Ultrasound Multi-frame Image Storage                       | Yes                   | Yes                       |
| Enhanced US Volume Storage                                 | Yes                   | No                        |
| Enhanced SR Storage                                        | Yes                   | Yes                       |
| Comprehensive SR Storage                                   | Yes                   | Yes                       |
| CT Image Storage                                           | No                    | Yes                       |
| MR Image Storage                                           | No                    | Yes                       |
| Digital Mammography X-Ray Image Storage - for Presentation | No                    | Yes                       |
| Positron Emission Tomography Image Storage                 | No                    | Yes                       |
| <b>Query/Retrieve</b>                                      |                       |                           |
| Study Root Q/R Information Model – FIND                    | Yes                   | No                        |
| Study Root Q/R Information Model – MOVE                    | Yes                   | No                        |
| <b>Workflow Management</b>                                 |                       |                           |
| Storage Commitment Push Model                              | Yes                   | No                        |
| Modality Worklist Information Model – FIND                 | Yes                   | No                        |
| Modality Performed Procedure Step                          | Yes                   | No                        |
| <b>Print Management</b>                                    |                       |                           |
| Basic Grayscale Print Management                           | Yes                   | No                        |
| Basic Color Print Management                               | Yes                   | No                        |

Table 1-2 provides an overview of the Media Storage Application Profiles supported by *Aplio*.

**Table 1-2  
MEDIA SERVICES**

| Media Storage Application Profile | Write Files (FSC or FSU) | Read Files (FSR) |
|-----------------------------------|--------------------------|------------------|
| <b>Compact Disk – Recordable</b>  |                          |                  |
| General Purpose CD-R              | Yes                      | Yes              |
| <b>DVD ± Recordable</b>           |                          |                  |
| General Purpose DVD               | Yes                      | Yes              |
| <b>USB Media</b>                  |                          |                  |
| General Purpose USB Media         | Yes                      | Yes              |

## 3.2 AUDIENCE

This document is intended for hospital staff, health system integrators, software designers or implementers. It is assumed that the reader has a working understanding of DICOM.

## 3.3 REMARKS

DICOM, by itself, does not guarantee interoperability. However, the Conformance Statement facilitates a first-level validation for interoperability between different applications supporting the same DICOM functionality.

This Conformance Statement is not intended to replace validation with other DICOM equipment to ensure proper exchange of information intended.

The scope of this Conformance Statement is to facilitate communication with CANON INC. and other vendors' Medical equipment. The Conformance Statement should be read and understood in conjunction with the DICOM Standard [DICOM]. However, by itself it is not guaranteed to ensure the desired interoperability and a successful interconnectivity.

The user should be aware of the following important issues:

- The comparison of different conformance statements is the first step towards assessing interconnectivity between CANON INC. and non-CANON INC. equipment.
- Test procedures should be defined to validate the desired level of connectivity.
- The DICOM standard will evolve to meet the users' future requirements. CANON INC. is actively involved in developing the standard further and therefore reserves the right to make changes to its products or to discontinue its delivery.

### 3.4 DEFINITIONS, TERMS AND ABBREVIATIONS

Definitions, terms and abbreviations used in this document are defined within the different parts of the DICOM standard.

Abbreviations and terms are as follows:

|                  |                                                                                                               |
|------------------|---------------------------------------------------------------------------------------------------------------|
| <b>AE</b>        | Application Entity                                                                                            |
| <b>ACSE</b>      | Association Control Service Element                                                                           |

4. NETWORKING

4.1 IMPLEMENTATION MODEL

4.1.1 Application Data Flow

Figure 4.1-1  
APPLICATION DATA FLOW DIAGRAM

- The Verification SCU AE issues a C-ECHO to verify a DICOM connection to a remote AE. It is associated with the local real-world activity "Verify Connectivity". "Verify Connectivity" is performed via the Service Tool.
- The Verification SCP AE responds successfully to C-ECHO requests from known AE Titles. It is associated with the local real-world activity "Respond to Verification Request".
- The Storage SCU AE sends instances to a remote AE. It is associated with the local real-world activity "Send Instances". "Send Instances" is performed upon user request for specific instances selected. If the remote AE is configured as a Storage Commitment SCP AE, the Storage SCU AE will send a storage commitment request to the Storage Commitment SCU AE.
- Receiving the storage commitment request from the Storage SCU AE, the Storage Commitment SCU AE will request Storage Commitment and if a commitment is successfully obtained will record this information in the local database.
- The MWM SCU AE receives worklist information from a remote AE. It is associated with the local real-world activity "Update Worklist". When the "Update Worklist" is performed the MWM SCU AE queries a remote AE for worklist items and provides the set of worklist items matching the query request. "Update Worklist" is performed manually or automatically.
- The MPPS SCU AE sends MPPS information to a remote AE. It is associated with the local real-world activity "Acquire Instances". When the "Acquire Instances" is performed the MPPS SCU AE creates and updates Modality Performed Procedure Step instances managed by a remote AE. Acquisition of instances will result in automated creation of an MPPS instance. Completion of the MPPS is performed as the result of an operator action.
- The Q/R SCU AE queries a remote AE for lists of studies and retrieves selected studies. It is associated with the local real-world activity "Query and Retrieve Instances".
- The Storage SCP AE receives incoming instances. It is associated with the local real-world activity "Store Instances to the Local File System". "Store Instances to the Local File System" stores the received instances to the local file system.
- The Print SCU AE prints images on a remote AE (Printer). It is associated with the local real-world activity "Send Images & Print Management Information". "Send Images & Print Management Information" creates a print-job within the print queue containing one or more virtual film sheets composed from images selected by the user.

## **4.1.2 Functional Definition of AEs**

### **4.1.2.1 Functional Definition of Verification SCU AE**

The Verification SCU AE issues a C-ECHO to verify a DICOM connection to a remote AE. It is performed via the Service Tool.

### **4.1.2.2 Functional Definition of Verification SCP AE**

The Verification SCP AE responds successfully to C-ECHO requests from known AE Titles.

### **4.1.2.3 Functional Definition of Storage SCU AE**

The existence of a send-job queue entry with associated network destination will activate the Storage SCU AE. An association request is sent to the destination AE and upon successful negotiation of a Presentation Context the image transfer is started. If the image transfer fails, the Storage SCU AE will retry this send-job automatically. If the remote AE is configured as a Storage Commitment SCP AE, the Storage SCU AE will request Storage Commitment to the Storage Commitment SCU AE.

### **4.1.2.4 Functional Definition of Storage Commitment SCU AE**

The Storage Commitment SCU AE will request Storage Commitment and if a commitment is successfully obtained will record this information in the local database.

### **4.1.2.5 Functional Definition of MWM SCU AE**

The MWM SCU AE attempts to download a worklist from a remote node. If the MWM SCU AE establishes an association to a remote AE, it will transfer patient's information and worklist items via the open association. The results will be displayed in a separate list. The patient's information will be used for the patient registration.

### **4.1.2.6 Functional Definition of MPPS SCU AE**

The MPPS SCU AE performs the creation of an MPPS Instance automatically when the user selects and starts a worklist item. Further updates on the MPPS data can be performed when the user completes the acquisition.

### **4.1.2.7 Functional Definition of Q/R SCU AE**

The Q/R SCU AE is activated when the user selects a remote node to query and enters some key information, Patient's Name, Patient ID and/or Study Date. The user can select studies to be retrieved. The instances will be received at the Storage SCP AE.

### **4.1.2.8 Functional Definition of Storage SCP AE**

The Storage SCP AE waits for another application to connect at the presentation address configured for its Application Entity Title. The Storage SCP AE will accept Associations with Presentation Contexts for SOP Classes of the Verification and Storage Service Classes. Any instances received on such Presentation Contexts will be stored to the local file system.

### **4.1.2.9 Functional Definition of Print SCU AE**

The existence of a print-job in the print queue will activate the Print SCU AE. An association is established with the printer and the printer's status determined. If the printer is operating normally, the film sheets described within the print-job will be printed. If the printer is not operating normally, this print-job can be canceled or restarted by the user operations.

### 4.1.3 Sequencing of Real-World Activities

**Figure 4.1-2**  
**SEQUENCING CONSTRAINTS**

Under typical scheduled workflow conditions the sequencing constraints illustrated in Figure 4.1-2 apply:

1. Query Worklist
2. Receive Worklist of Modality Scheduled Procedure Steps (MSPS)
3. Select Workitem (MSPS) from Worklist
4. Start Acquisition and Create MPPS
5. Acquire Instances
6. Complete Acquisition and Finalize MPPS
7. Store Acquired Instances
8. Commit Acquired Instances
9. Query/Retrieve Instances
10. Receive Instances
11. Print Images

Other workflow situations (e.g. unscheduled procedure steps) will have other sequencing constraints. Some activities may be omitted according to situations.

## 4.2 AE SPECIFICATIONS

### 4.2.1 Verification SCU AE Specification

#### 4.2.1.1 SOP Classes

The Verification SCU AE provides Standard Conformance to the following SOP Classes:

**Table 4.2-1**  
**SOP CLASSES FOR THE VERIFICATION SCU AE**

| SOP Class Name | SOP Class UID     | SCU | SCP |
|----------------|-------------------|-----|-----|
| Verification   | 1.2.840.10008.1.1 | Yes | No  |

#### 4.2.1.2 Association Policies

##### 4.2.1.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 4.2-2**  
**DICOM APPLICATION CONTEXT FOR THE VERIFICATION SCU AE**

|                          |                       |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

##### 4.2.1.2.2 Number of Associations

The Verification SCU AE initiates one association at a time.

**Table 4.2-3**  
**NUMBER OF ASSOCIATIONS INITIATED FOR THE VERIFICATION SCU AE**

|                                             |   |
|---------------------------------------------|---|
| Maximum number of simultaneous associations | 1 |
|---------------------------------------------|---|

##### 4.2.1.2.3 Asynchronous Nature

The Verification SCU AE does not support asynchronous communication (multiple outstanding transactions over a single association).

**Table 4.2-4**  
**ASYNCHRONOUS NATURE FOR THE VERIFICATION SCU AE**

|                                                         |   |
|---------------------------------------------------------|---|
| Maximum number of outstanding asynchronous transactions | 1 |
|---------------------------------------------------------|---|

##### 4.2.1.2.4 Implementation Identifying Information

The implementation information for the Verification SCU AE is:

**Table 4.2-5**  
**DICOM Implementation Class and Version FOR THE VERIFICATION SCU AE**

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Implementation Class UID    | 1.2.392.200036.9116.6.28.1000.1 (CUS-AA550)<br>1.2.392.200036.9116.6.29.1000.1 (CUS-AA450)<br>1.2.392.200036.9116.6.33.1000.1 (CUS-AA000) |
| Implementation Version Name | CM_UL_DCM_V1.0<br>for Original<br>TM_UL_DCM_V1.0<br>for Option                                                                            |

### 4.2.1.3 Association Initiation Policy

#### 4.2.1.3.1 Activity – Verify Connectivity

##### 4.2.1.3.1.1 Description and Sequencing of Activities

The Verification SCU AE attempts to initiate a new association in order to issue a verification request (C-ECHO).

**Figure 4.2-1**  
**SEQUENCING OF ACTIVITY – VERIFY CONNECTIVITY**

A possible sequence of interactions between the Verification SCU AE and an Image Server (e.g. a storage or archive device supporting the Verification SOP Classes as an SCP) is illustrated in the figure above:

1. The Verification SCU AE opens an association with the Image Server.
2. The Verification SCU AE issues a verification request (C-ECHO) and the Image Server replies with a C-ECHO response (status success).
3. The Verification SCU AE closes the association with the Image Server.

##### 4.2.1.3.1.2 Proposed Presentation Contexts

The Verification SCU AE will propose the Presentation Contexts shown in the following table:

**Table 4.2-6**  
**PROPOSED PRESENTATION CONTEXTS FOR ACTIVITY VERIFY CONNECTIVITY**

| Presentation Context Table |                   |                           |                     |      |           |
|----------------------------|-------------------|---------------------------|---------------------|------|-----------|
| Abstract Syntax            |                   | Transfer Syntax           |                     | Role | Ext. Neg. |
| Name                       | UID               | Name List                 | UID List            |      |           |
| Verification               | 1.2.840.10008.1.1 | Implicit VR Little Endian | 1.2.840.10008.1.2   | SCU  | None      |
|                            |                   | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |      |           |

#### 4.2.1.3.1.3 SOP Specific Conformance for Verification SOP Class

The Verification SCU AE provides standard conformance to the Verification Service Class as an SCU.

The behavior of Verification SCU AE when encountering status codes in a C-ECHO response is summarized in the table below:

**Table 4.2-7**  
**VERIFICATION RESPONSE STATUS HANDLING BEHAVIOR**

| <b>Service Status</b> | <b>Further Meaning</b> | <b>Status Code</b> | <b>Behavior</b>                                                                    |
|-----------------------|------------------------|--------------------|------------------------------------------------------------------------------------|
| Success               | Success                | 0000               | The Verification SCU AE judges the remote AE is present and active on the network. |

The behavior of Verification SCU AE during communication failure is summarized in the table below:

**Table 4.2-8**  
**VERIFICATION COMMUNICATION FAILURE BEHAVIOR**

| <b>Exception</b>                                 | <b>Behavior</b>                                                                       |
|--------------------------------------------------|---------------------------------------------------------------------------------------|
| Timeout                                          | The association is aborted and the failure reason is logged and reported to the user. |
| Association aborted by the SCP or network layers | The failure reason is logged and reported to the user.                                |

## 4.2.2 Verification SCP AE Specification

### 4.2.2.1 SOP Classes

The Verification SCP AE provides Standard Conformance to the following SOP Classes:

**Table 4.2-9**  
**SOP CLASSES FOR THE VERIFICATION SCP AE**

| SOP Class Name | SOP Class UID     | SCU | SCP |
|----------------|-------------------|-----|-----|
| Verification   | 1.2.840.10008.1.1 | No  | Yes |

### 4.2.2.2 Association Policies

#### 4.2.2.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 4.2-10**  
**DICOM APPLICATION CONTEXT FOR THE VERIFICATION SCP AE**

|                          |                       |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

#### 4.2.2.2.2 Number of Associations

**Table 4.2-11**  
**NUMBER OF ASSOCIATIONS ACCEPTED FOR THE VERIFICATION SCP AE**

|                                             |           |
|---------------------------------------------|-----------|
| Maximum number of simultaneous associations | Unlimited |
|---------------------------------------------|-----------|

#### 4.2.2.2.3 Asynchronous Nature

The Verification SCP AE does not support asynchronous communication (multiple outstanding transactions over a single association).

**Table 4.2-12**  
**ASYNCHRONOUS NATURE FOR THE VERIFICATION SCP AE**

|                                                         |   |
|---------------------------------------------------------|---|
| Maximum number of outstanding asynchronous transactions | 1 |
|---------------------------------------------------------|---|

#### 4.2.2.2.4 Implementation Identifying Information

The implementation information for the Verification SCP AE is:

**Table 4.2-13**  
**DICOM IMPLEMENTATION CLASS AND VERSION FOR THE VERIFICATION SCP AE**

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Implementation Class UID    | 1.2.392.200036.9116.6.28.1000.1 (CUS-AA550)<br>1.2.392.200036.9116.6.29.1000.1 (CUS-AA450)<br>1.2.392.200036.9116.6.33.1000.1 (CUS-AA000) |
| Implementation Version Name | CM_UL_DCM_V1.0<br>for Original<br>TM_UL_DCM_V1.0<br>for Option                                                                            |

### 4.2.2.3 Association Initiation Policy

The Verification SCP AE does not initiate associations.

### 4.2.2.4 Association Acceptance Policy

#### 4.2.2.4.1 Activity – Respond to Verification Request

##### 4.2.2.4.1.1 Description and Sequencing of Activities

When the Verification SCP AE accepts an association, it will respond to a verification request (C-ECHO).

**Figure 4.2-2**  
**SEQUENCING OF ACTIVITY – RESPOND TO VERIFICATION REQUEST**

A possible sequence of interactions between the Verification SCP AE and an Image Server (e.g. a storage or archive device supporting the Verification SOP Classes as an SCU) is illustrated in the figure above:

1. The Image Server opens an association with the Verification SCP AE.
2. The Image Server issues a verification request (C-ECHO) and the Verification SCP AE replies with a C-ECHO response (status success).
3. The Image Server closes the association with the Verification SCP AE.

The Verification SCP AE may reject association attempts as shown in the table below. The Result, Source and Reason/Diag columns represent the values returned in the appropriate fields of an ASSOCIATE-RJ PDU (see PS 3.8, Section 9.3.4). The contents of the Source column are abbreviated to save space and the meaning of the abbreviations are:

- a. 1 - DICOM UL service-user
- b. 2 - DICOM UL service-provider (ACSE related function)

**Table 4.2-14**  
**ASSOCIATION REJECTION REASONS**

| Result                 | Source | Reason/Diag                         | Explanation                                                                                                                                                                                                                                                                                                                                     |
|------------------------|--------|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 – rejected-permanent | a      | 3 – calling-AE-title-not-recognized | The association request contained an unrecognized calling AE Title. An association request with the same parameters will not succeed at a later time unless configuration changes are made. This rejection reason normally occurs when the association acceptor has not been configured to recognize the AE Title of the association initiator. |
| 1 – rejected-permanent | b      | 1 – no-reason-given                 | The association request could not be parsed. An association request with the same format will not succeed at a later time.                                                                                                                                                                                                                      |

#### 4.2.2.4.1.2 Accepted Presentation Contexts

The default behavior of the Verification SCP AE supports the Implicit VR Little Endian and Explicit VR Little Endian transfer syntaxes. If the both transfer syntaxes are proposed per presentation context then the Verification SCP AE will select Explicit VR Little Endian transfer syntax.

**Table 4.2-15**

#### **PROPOSED PRESENTATION CONTEXTS FOR ACTIVITY RESPOND TO VERIFICATION REQUEST**

| <b>Presentation Context Table</b> |                   |                           |                     |             |                  |
|-----------------------------------|-------------------|---------------------------|---------------------|-------------|------------------|
| <b>Abstract Syntax</b>            |                   | <b>Transfer Syntax</b>    |                     | <b>Role</b> | <b>Ext. Neg.</b> |
| <b>Name</b>                       | <b>UID</b>        | <b>Name List</b>          | <b>UID List</b>     |             |                  |
| Verification                      | 1.2.840.10008.1.1 | Implicit VR Little Endian | 1.2.840.10008.1.2   | SCP         | None             |
|                                   |                   | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |             |                  |

#### 4.2.2.4.1.3 SOP Specific Conformance for Verification SOP Class

The Verification SCP AE provides standard conformance to the Verification Service Class as an SCP.

## 4.2.3 Storage SCU AE Specification

### 4.2.3.1 SOP Classes

The Storage SCU AE provides Standard Conformance to the following SOP Classes:

**Table 4.2-16**  
**SOP CLASSES FOR THE STORAGE SCU AE**

| SOP Class Name                       | SOP Class UID                 | SCU | SCP |
|--------------------------------------|-------------------------------|-----|-----|
| Secondary Capture Image Storage      | 1.2.840.10008.5.1.4.1.1.7     | Yes | No  |
| Ultrasound Image Storage             | 1.2.840.10008.5.1.4.1.1.6.1   |     |     |
| Ultrasound Multi-frame Image Storage | 1.2.840.10008.5.1.4.1.1.3.1   |     |     |
| Enhanced US Volume Storage           | 1.2.840.10008.5.1.4.1.1.6.2   |     |     |
| Enhanced SR Storage                  | 1.2.840.10008.5.1.4.1.1.88.22 |     |     |
| Comprehensive SR Storage             | 1.2.840.10008.5.1.4.1.1.88.33 |     |     |

### 4.2.3.2 Association Policies

#### 4.2.3.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 4.2-17**  
**DICOM APPLICATION CONTEXT FOR THE STORAGE SCU AE**

|                          |                       |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

#### 4.2.3.2.2 Number of Associations

The Storage SCU AE can initiate up to an association at a time for each destination to which a transfer request is being processed in the active job queue list. Up to ten jobs, that instances will be sent to the different remote hosts, will be active at a time, the other remains pending until the active job is completed or failed.

**Table 4.2-18**  
**NUMBER OF ASSOCIATIONS INITIATED FOR THE STORAGE SCU AE**

|                                             |   |
|---------------------------------------------|---|
| Maximum number of simultaneous associations | 1 |
|---------------------------------------------|---|

#### 4.2.3.2.3 Asynchronous Nature

The Storage SCU AE does not support asynchronous communication (multiple outstanding transactions over a single association).

**Table 4.2-19**  
**ASYNCHRONOUS NATURE FOR THE STORAGE SCU AE**

|                                                         |   |
|---------------------------------------------------------|---|
| Maximum number of outstanding asynchronous transactions | 1 |
|---------------------------------------------------------|---|

#### 4.2.3.2.4 Implementation Identifying Information

The implementation information for the Storage SCU AE is:

**Table 4.2-20**  
**DICOM IMPLEMENTATION CLASS AND VERSION FOR THE STORAGE SCU AE**

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Implementation Class UID    | 1.2.392.200036.9116.6.28.1000.1 (CUS-AA550)<br>1.2.392.200036.9116.6.29.1000.1 (CUS-AA450)<br>1.2.392.200036.9116.6.33.1000.1 (CUS-AA000) |
| Implementation Version Name | CM_UL_DCM_V1.0<br>for Original<br>TM_UL_DCM_V1.0<br>for Option                                                                            |

### 4.2.3.3 Association Initiation Policy

#### 4.2.3.3.1 Activity – Send Instances

##### 4.2.3.3.1.1 Description and Sequencing of Activities

The Storage SCU AE attempts to initiate a new association in order to issue a storage request (C-STORE). If the job contains multiple instances then multiple C-STORE requests will be issued over the same association. If the instance transfer fails, the Storage SCU AE will retry this send-job automatically.

**Figure 4.2-3**  
**SEQUENCING OF ACTIVITY – SEND INSTANCES**

A possible sequence of interactions between the Storage SCU AE and an Image Server (e.g. a storage or archive device supporting the Storage SOP Classes as an SCP) is illustrated in the Figure above:

1. The Storage SCU AE opens an association with the Image Server.
2. Acquired instances are transmitted to the Image Server using a storage request (C-STORE) and the Image Server replies with a C-STORE response (status success).
3. The Storage SCU AE closes the association with the Image Server.

#### 4.2.3.3.1.2 Proposed Presentation Contexts

The Storage SCU AE will propose the Presentation Contexts in the following table that shows one Presentation Context Item per row:

**Table 4.2-21  
PROPOSED PRESENTATION CONTEXTS FOR ACTIVITY SEND INSTANCES**

| Presentation Context Table           |                               |                             |                        |      |           |
|--------------------------------------|-------------------------------|-----------------------------|------------------------|------|-----------|
| Abstract Syntax                      |                               | Transfer Syntax             |                        | Role | Ext. Neg. |
| Name                                 | UID                           | Name List                   | UID List               |      |           |
| Secondary Capture Image Storage      | 1.2.840.10008.5.1.4.1.1.7     | Implicit VR Little Endian   | 1.2.840.10008.1.2      | SCU  | None      |
|                                      |                               | Explicit VR Little Endian   | 1.2.840.10008.1.2.1    |      |           |
|                                      |                               | JPEG Lossy <sup>*1</sup>    | 1.2.840.10008.1.2.4.50 |      |           |
|                                      |                               | JPEG Lossless <sup>*2</sup> | 1.2.840.10008.1.2.4.70 |      |           |
|                                      |                               | RLE Lossless                | 1.2.840.10008.1.2.5    |      |           |
| Ultrasound Image Storage             | 1.2.840.10008.5.1.4.1.1.6.1   | Implicit VR Little Endian   | 1.2.840.10008.1.2      |      |           |
|                                      |                               | Explicit VR Little Endian   | 1.2.840.10008.1.2.1    |      |           |
|                                      |                               | JPEG Lossy <sup>*1</sup>    | 1.2.840.10008.1.2.4.50 |      |           |

#### 4.2.3.3.1.3 SOP Specific Conformance for Storage SOP Classes

The Storage SCU AE provides standard conformance to the Storage Service Class as an SCU.

The behavior of Storage SCU AE when encountering status codes in a C-STORE response is summarized in the table below:

**Table 4.2-22**  
**STORAGE C-STORE RESPONSE STATUS HANDLING BEHAVIOR**

| Service Status | Further Meaning | Status Code           | Behavior                                                                                                                                                                   |
|----------------|-----------------|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Success        | Success         | 0000                  | The SCP has successfully stored the SOP Instance. If all SOP Instances in a send job have status success then the job is marked as complete.                               |
| *              | *               | Any other status code | The association is aborted and the send job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application. |

The behavior of Storage SCU AE during communication failure is summarized in the table below:

**Table 4.2-23**  
**STORAGE COMMUNICATION FAILURE BEHAVIOR**

| Exception                                        | Behavior                                                                                                                                                           |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Timeout                                          | The association is aborted and the send job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application. |
| Association aborted by the SCP or network layers | The send job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application.                                |

If the instance transfer fails, the Storage SCU AE will retry this send-job automatically (see Section 0).

The contents of Storage SOP Instances created by the Storage SCU AE conform to the IOD definitions and are described in section 8.1.

## 4.2.4 Storage Commitment SCU AE Specification

### 4.2.4.1 SOP Classes

The Storage Commitment SCU AE provides Standard Conformance to the following SOP Classes:

**Table 4.2-24**  
**SOP CLASSES FOR THE STORAGE COMMITMENT SCU AE**

| SOP Class Name                | SOP Class UID        | SCU | SCP |
|-------------------------------|----------------------|-----|-----|
| Storage Commitment Push Model | 1.2.840.10008.1.20.1 | Yes | No  |

### 4.2.4.2 Association Policies

#### 4.2.4.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 4.2-25**  
**DICOM APPLICATION CONTEXT FOR THE STORAGE COMMITMENT SCU AE**

|                          |                       |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

#### 4.2.4.2.2 Number of Associations

The Storage Commitment SCU AE can initiate up to an association at a time.

**Table 4.2-26**  
**NUMBER OF ASSOCIATIONS INITIATED FOR THE STORAGE COMMITMENT SCU AE**

|                                             |   |
|---------------------------------------------|---|
| Maximum number of simultaneous associations | 1 |
|---------------------------------------------|---|

The Storage Commitment SCU AE accepts associations to receive N-EVENT-REPORT notifications for the Storage Commitment Push Model SOP Class.

**Table 4.2-27**  
**NUMBER OF ASSOCIATIONS ACCEPTED FOR THE STORAGE COMMITMENT SCU AE**

|                                             |    |
|---------------------------------------------|----|
| Maximum number of simultaneous associations | 10 |
|---------------------------------------------|----|

#### 4.2.4.2.3 Asynchronous Nature

The Storage Commitment SCU AE does not support asynchronous communication (multiple outstanding transactions over a single association).

**Table 4.2-28**  
**ASYNCHRONOUS NATURE FOR THE STORAGE COMMITMENT SCU AE**

|                                                         |   |
|---------------------------------------------------------|---|
| Maximum number of outstanding asynchronous transactions | 1 |
|---------------------------------------------------------|---|

#### 4.2.4.2.4 Implementation Identifying Information

The implementation information for the Storage Commitment SCU AE is:

**Table 4.2-29**  
**DICOM IMPLEMENTATION CLASS AND VERSION FOR THE STORAGE COMMITMENT SCU AE**

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Implementation Class UID    | 1.2.392.200036.9116.6.28.1000.1 (CUS-AA550)<br>1.2.392.200036.9116.6.29.1000.1 (CUS-AA450)<br>1.2.392.200036.9116.6.33.1000.1 (CUS-AA000) |
| Implementation Version Name | CM_UL_DCM_V1.0<br>for Original<br>TM_UL_DCM_V1.0<br>for Option                                                                            |

### 4.2.4.3 Association Initiation Policy

#### 4.2.4.3.1 Activity – Commit Sent Instances

##### 4.2.4.3.1.1 Description and Sequencing of Activities

If the remote AE is configured as a Storage Commitment SCP AE, the Storage Commitment SCU AE will, after all instances have been sent, transmit a single storage commitment request (N-ACTION). Upon receiving the N-ACTION response the Storage Commitment SCU AE will release the association. The notification of storage commitment (N-EVENT-REPORT) will be received over a separate association.

**Figure 4.2-4**  
**SEQUENCING OF ACTIVITY – COMMIT SENT INSTANCES**

A possible sequence of interactions between the Storage Commitment SCU AE and an Image Server (e.g. a storage or archive device supporting the Storage Commitment SOP Classes as an SCP) is illustrated in the Figure above:

1. The Storage Commitment SCU AE opens an association with the Image Server.
2. A storage commitment request (N-ACTION) is transmitted to the Image Server to obtain storage commitment of previously transmitted instances. The Image Server replies with an N-ACTION response indicating the request has been received and is being processed.
3. The Storage Commitment SCU AE closes the association with the Image Server.

Note: The N-EVENT-REPORT will be sent over a separate association initiated by the Image Server (see Section 4.2.4.4.1).

#### 4.2.4.3.1.2 Proposed Presentation Contexts

The Storage Commitment SCU AE will propose the Presentation Contexts shown in the following table:

**Table 4.2-30**  
**PROPOSED PRESENTATION CONTEXTS FOR ACTIVITY COMMIT SENT INSTANCES**

| Presentation Context Table    |                      |                           |                     |      |           |
|-------------------------------|----------------------|---------------------------|---------------------|------|-----------|
| Abstract Syntax               |                      | Transfer Syntax           |                     | Role | Ext. Neg. |
| Name                          | UID                  | Name List                 | UID List            |      |           |
| Storage Commitment Push Model | 1.2.840.10008.1.20.1 | Implicit VR Little Endian | 1.2.840.10008.1.2   | SCU  | None      |
|                               |                      | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |      |           |

A Presentation Context for the Storage Commitment Push Model will only be proposed if the remote AE is configured as a Storage Commitment SCP AE.

#### 4.2.4.3.1.3 SOP Specific Conformance for Storage Commitment SOP Class

##### 4.2.4.3.1.3.1 Storage Commitment Operations (N-ACTION)

The Storage Commitment SCU AE provides standard conformance to the Storage Commitment Service Class as an SCU.

The Storage Commitment SCU AE will request storage commitment for instances of the Storage SOP Classes if the remote AE is configured as a Storage Commitment SCP AE and a presentation context for the Storage Commitment Push Model has been accepted.

The behavior of Storage SCU Commitment AE when encountering status codes in an N-ACTION response is summarized in the table below:

**Table 4.2-31**  
**STORAGE COMMITMENT N-ACTION RESPONSE STATUS HANDLING BEHAVIOR**

| Service Status | Further Meaning | Status Code           | Behavior                                                                                                                                                                                                   |
|----------------|-----------------|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Success        | Success         | 0000                  | The request for storage commitment is considered successfully sent.<br>A timer is started which will expire if no N-EVENT-REPORT for the Transaction UID is received within a configurable timeout period. |
| *              | *               | Any other status code | The association is aborted and the request for storage commitment is marked as failed.                                                                                                                     |

The behavior of Storage Commitment AE during communication failure is summarized in the table below:

**Table 4.2-32**  
**STORAGE COMMITMENT COMMUNICATION FAILURE BEHAVIOR**

| Exception                                        | Behavior                                                                                                                                                           |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Timeout                                          | The association is aborted and the send job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application. |
| Association aborted by the SCP or network layers | The send job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application.                                |

If the instance transfer fails, the Storage Commitment AE will retry this send-job automatically (see Section 4.2.4).

## 4.2.4.4 Association Acceptance Policy

### 4.2.4.4.1 Activity – Receive Storage Commitment Response

#### 4.2.4.4.1.1 Description and Sequencing of Activities

The Storage Commitment SCU AE will accept associations in order to receive responses to a storage commitment request.

**Figure 4.2-5**  
**SEQUENCING OF ACTIVITY - RECEIVE STORAGE COMMITMENT RESPONSE**

A possible sequence of interactions between the Storage Commitment SCU AE and an Image Server (e.g. a storage or archive device supporting Storage Commitment SOP Classes as an SCP) is illustrated in the Figure above:

1. The Image Server opens an association with the Storage Commitment SCU AE.
2. The Image Server sends an N-EVENT-REPORT request notifying the Storage SCU AE of the status of a previous storage commitment request. The Storage SCU AE replies with an N-EVENT-REPORT response confirming receipt.
3. The Image Server closes the association with the Storage Commitment SCU AE.

The Storage Commitment SCU AE may reject association attempts as shown in the Table 4.2-14.

#### 4.2.4.4.1.2 Accepted Presentation Contexts

The Storage Commitment SCU AE will accept Presentation Contexts shown in the table below.

**Table 4.2-33**  
**ACCEPTABLE PRESENTATION CONTEXTS FOR**  
**ACTIVITY RECEIVE STORAGE COMMITMENT RESPONSE**

| Presentation Context Table    |                      |                           |                     |      |           |
|-------------------------------|----------------------|---------------------------|---------------------|------|-----------|
| Abstract Syntax               |                      | Transfer Syntax           |                     | Role | Ext. Neg. |
| Name                          | UID                  | Name List                 | UID List            |      |           |
| Storage Commitment Push Model | 1.2.840.10008.1.20.1 | Implicit VR Little Endian | 1.2.840.10008.1.2   | SCU  | None      |
|                               |                      | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |      |           |

#### 4.2.4.4.1.3 SOP Specific Conformance for Storage Commitment SOP Class

##### 4.2.4.4.1.3.1 Storage Commitment Notifications (N-EVENT-REPORT)

The Storage Commitment SCU AE provides standard conformance to the Storage Commitment Service Class as an SCU.

The behavior of Storage Commitment SCU AE when receiving Event Types within the N-EVENT-REPORT is summarized in the table below.

**Table 4.2-34**  
**STORAGE COMMITMENT N-EVENT-REPORT BEHAVIOUR**

| Event Type Name                                      | Event Type ID | Behavior                                                                                                                                                                                                |
|------------------------------------------------------|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Storage Commitment Request Successful                | 1             | The Storage Commitment SCU AE permits the operator(s) to delete the Referenced SOP Instances under Referenced SOP Sequence (0018,1199), or deletes the Instances from the local database automatically. |
| Storage Commitment Request Complete – Failures Exist | 2             | The Storage Commitment SCU AE requests the Storage SCU AE to send the Referenced SOP Instances under Failed SOP Sequence (0018,1198).                                                                   |

The reasons for returning specific status codes in a N-EVENT-REPORT response are summarized in the table below.

**Table 4.2-35**  
**STORAGE COMMITMENT N-EVENT-REPORT RESPONSE STATUS REASONS**

| Service Status | Further Meaning    | Status Code | Reasons                                                                                                                                             |
|----------------|--------------------|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Success        | Success            | 0000        | The storage commitment result has been successfully received.                                                                                       |
| Failure        | Processing Failure | 0110        | An internal error occurred during processing of the N-EVENT-REPORT. A short description of the error will be returned in Error Comment (0000,0902). |

## 4.2.5 MWM SCU AE Specification

### 4.2.5.1 SOP Classes

The MWM SCU AE provides Standard Conformance to the following SOP Classes:

**Table 4.2-36**  
**SOP CLASSES FOR THE MWM SCU AE**

| SOP Class Name                             | SOP Class UID          | SCU | SCP |
|--------------------------------------------|------------------------|-----|-----|
| Modality Worklist Information Model – FIND | 1.2.840.10008.5.1.4.31 | Yes | No  |

### 4.2.5.2 Association Policies

#### 4.2.5.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 4.2-37**  
**DICOM APPLICATION CONTEXT FOR THE MWM SCU AE**

|                          |                       |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

#### 4.2.5.2.2 Number of Associations

The MWM SCU AE initiates one association at a time for a worklist request.

**Table 4.2-38**  
**NUMBER OF ASSOCIATIONS INITIATED FOR THE MWM SCU AE**

|                                             |   |
|---------------------------------------------|---|
| Maximum number of simultaneous associations | 1 |
|---------------------------------------------|---|

#### 4.2.5.2.3 Asynchronous Nature

The MWM SCU AE does not support asynchronous communication (multiple outstanding transactions over a single association).

**Table 4.2-39**  
**ASYNCHRONOUS NATURE FOR THE MWM SCU AE**

|                                                         |   |
|---------------------------------------------------------|---|
| Maximum number of outstanding asynchronous transactions | 1 |
|---------------------------------------------------------|---|

#### 4.2.5.2.4 Implementation Identifying Information

The implementation information for this Application Entity is:

**Table 4.2-40**  
**DICOM IMPLEMENTATION CLASS AND VERSION FOR THE MWM SCU AE**

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Implementation Class UID    | 1.2.392.200036.9116.6.28.1000.1 (CUS-AA550)<br>1.2.392.200036.9116.6.29.1000.1 (CUS-AA450)<br>1.2.392.200036.9116.6.33.1000.1 (CUS-AA000) |
| Implementation Version Name | CM_UL_DCM_V1.0<br>for Original<br>TM_UL_DCM_V1.0<br>for Option                                                                            |

### 4.2.5.3 Association Initiation Policy

#### 4.2.5.3.1 Activity – Update Worklist

##### 4.2.5.3.1.1 Description and Sequencing of Activities

The request for an "Update Worklist" is initiated by user interaction, i.e. pressing the buttons "Get Worklist" or automatically at the time of patient registration.

Upon initiation of the request, the MWM SCU AE will build an Identifier for the C-FIND request, will initiate an association to send the request and will wait for worklist responses. After retrieval of all responses, the MWM SCU AE will access the local database to add or update patient demographic data. The results will be displayed in a separate list.

The MWM SCU AE will initiate an association in order to issue a C-FIND request according to the Modality Worklist Information Model.

**Figure 4.2-6**  
**SEQUENCING OF ACTIVITY – UPDATE WORKLIST**

A possible sequence of interactions between the MWM SCU AE and a Department Scheduler (e.g. a device such as a RIS or HIS which supports the Modality Worklist SOP Class as an SCP) is illustrated in the Figure above:

1. The MWM SCU AE opens an association with the Department Scheduler
2. The MWM SCU AE sends a C-FIND request to the Department Scheduler containing the Worklist Query attributes.
3. The Department Scheduler returns a C-FIND response containing the requested attributes of the first matching worklist item.
4. The Department Scheduler returns another C-FIND response containing the requested attributes of the second matching worklist item.
5. The Department Scheduler returns another C-FIND response with status Success indicating that no further matching worklist items exist. This example assumes that only 2 worklist items match the Worklist Query.
6. The MWM SCU AE closes the association with the Department Scheduler.
7. The user selects a worklist item from the Worklist and prepares to acquire new instances.

#### 4.2.5.3.1.2 Proposed Presentation Contexts

The MWM SCU AE will propose Presentation Contexts shown in the following table:

**Table 4.2-41**  
**PROPOSED PRESENTATION CONTEXTS FOR ACTIVITY UPDATE WORKLIST**

| Presentation Context Table                 |                        |                           |                     |      |          |
|--------------------------------------------|------------------------|---------------------------|---------------------|------|----------|
| Abstract Syntax                            |                        | Transfer Syntax           |                     | Role | Ext.Neg. |
| Name                                       | UID                    | Name List                 | UID List            |      |          |
| Modality Worklist Information Model – FIND | 1.2.840.10008.5.1.4.31 | Implicit VR Little Endian | 1.2.840.10008.1.2   | SCU  | None     |
|                                            |                        | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |      |          |

#### 4.2.5.3.1.3 SOP Specific Conformance for Modality Worklist SOP Class

The MWM SCU AE provides standard conformance to the Modality Worklist SOP Class as an SCU.

The behavior of the MWM SCU when encountering status codes in a Modality Worklist C-FIND response is summarized in the table below.

**Table 4.2-42**  
**MODALITY WORKLIST C-FIND RESPONSE STATUS HANDLING BEHAVIOR**

| Service Status | Further Meaning                                                                    | Status Code           | Behavior                                                                                                                                                                                                                                                                                                                                         |
|----------------|------------------------------------------------------------------------------------|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Success        | Matching is complete                                                               | 0000                  | The SCP has completed the matches. Worklist items are available for display or further processing.                                                                                                                                                                                                                                               |
| Refused        | Out of Resources                                                                   | A700                  | The Association is aborted using A-ABORT and the worklist query is marked as failed. The status meaning is logged and reported to the user if an interactive query. Any additional error information in the Response will be logged.                                                                                                             |
| Failed         | Identifier does not match SOP Class                                                | A900                  |                                                                                                                                                                                                                                                                                                                                                  |
| Failed         | Unable to Process                                                                  | Cxxx                  |                                                                                                                                                                                                                                                                                                                                                  |
| Cancel         | Matching terminated due to Cancel request                                          | FE00                  | If the query was cancelled due to too many worklist items then the SCP has completed the matches. Worklist items are available for display or further processing. Otherwise, the Association is aborted using A-ABORT and the worklist query is marked as failed. The status meaning is logged and reported to the user if an interactive query. |
| Pending        | Matches are continuing                                                             | FF00                  | The worklist item contained in the Identifier is collected for later display or further processing.                                                                                                                                                                                                                                              |
| Pending        | Matches are continuing – Warning that one or more Optional Keys were not supported | FF01                  | The worklist item contained in the Identifier is collected for later display or further processing. The status meaning is logged only once for each C-FIND operation.                                                                                                                                                                            |
| *              | *                                                                                  | Any other status code | The association is aborted using A-ABORT and the status meaning is logged.                                                                                                                                                                                                                                                                       |

The behavior of the MWM SCU AE during communication failure is summarized in the table below.

**Table 4.2-43**  
**MODALITY WORKLIST COMMUNICATION FAILURE BEHAVIOR**

| <b>Exception</b>                                 | <b>Behavior</b>                                                    |
|--------------------------------------------------|--------------------------------------------------------------------|
| Timeout                                          | The association is aborted using A-ABORT and the reason is logged. |
| Unsupported character sets                       |                                                                    |
| Association aborted by the SCP or network layers | The reason is logged.                                              |

Acquired instances will always use the Study Instance UID specified for the Scheduled Procedure Step (if available). If an acquisition is unscheduled, a Study Instance UID will be generated locally.

The table below provides a description of the MWM SCU AE Worklist Request Identifier and specifies the attributes that are copied into the instances. Unexpected attributes returned in a C-FIND response are ignored.

**Table 4.2-44**  
**WORKLIST REQUEST IDENTIFIER**

The above table should be read as follows:

- Module Name: The name of the associated module for supported worklist attributes.
- Attribute Name: Attributes supported to build the MWM SCU AE Worklist Request Identifier.
- Tag: DICOM tag for this attribute.
- VR: DICOM VR for this attribute.
- M: Matching keys for (automatic) Worklist Update.  
S: Single Value Matching  
R: Range Matching
- R: Return keys. An "x" will indicate that the MWM SCU AE will supply this attribute as Return Key with zero length for Universal Matching. This setting can be configured using the service tool.
- Q: Interactive Query Key. An "x" will indicate that this product will supply this attribute as matching key, if entered in the Query Patient Worklist dialog. For example, the Patient Name can be entered thereby restricting Worklist responses to Procedure Steps scheduled for the patient.
- D: Displayed keys. An "x" indicates that this worklist attribute is displayed to the user during a patient registration. For example, Patient Name will be displayed when registering the patient prior to an examination.
- IOD: An "x" indicates that this worklist attribute is included into all Object Instances created during performance of the related Procedure Step.

Notes: Specific Character Set (0008,0005) will be created if an extended or replacement character set is used in the matching keys.

Patient's Institution Residence (0038,0400) will be displayed as *In Patient* or *Out Patient* when matching the following string: Inpatient or Outpatient.

In the default setting, Study Description (0008,1030) will be displayed at *Exam Type* when matching the following exam types: Abdomen, Carotid, Thyroid, Breast, OB, GYN, Endo-Vaginal, Fetal Heart, Adult Heart, Pediatric Heart, Coronary, TCD, Neo-Head, Neo-General, Neo-Hip, PV Venous, PV Arterial, Digits, MSK, Prostate, Kidney, Testes, OTHER or M-TEE. They can be also configured to correspond to user-defined terms, and it is selectable where to set those terms: Study Description (0008,1030), Scheduled Procedure Step Description (0040,0007), or Requested Procedure Description (0032,1060).

If a valid Study Instance UID is not get from the Department Scheduler, it will be generated locally.

Lists all schedules regardless of modality, but study always starts as US.

#### 4.2.5.4 Association Acceptance Policy

The MWM SCU AE does not accept associations.

## 4.2.6 MPPS SCU AE Specification

### 4.2.6.1 SOP Classes

The MPPS SCU AE provides Standard Conformance to the following SOP Classes:

**Table 4.2-45**  
**SOP CLASSES FOR THE MPPS SCU AE**

| SOP Class Name                    | SOP Class UID           | SCU | SCP |
|-----------------------------------|-------------------------|-----|-----|
| Modality Performed Procedure Step | 1.2.840.10008.3.1.2.3.3 | Yes | No  |

### 4.2.6.2 Association Policies

#### 4.2.6.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 4.2-46**  
**DICOM APPLICATION CONTEXT FOR THE MPPS SCU AE**

|                          |                       |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

#### 4.2.6.2.2 Number of Associations

The MPPS SCU AE initiates one association at a time.

**Table 4.2-47**  
**NUMBER OF ASSOCIATIONS INITIATED FOR THE MPPS SCU AE**

|                                             |   |
|---------------------------------------------|---|
| Maximum number of simultaneous associations | 1 |
|---------------------------------------------|---|

#### 4.2.6.2.3 Asynchronous Nature

The MPPS SCU AE does not support asynchronous communication (multiple outstanding transactions over a single association).

**Table 4.2-48**  
**ASYNCHRONOUS NATURE FOR THE MPPS SCU AE**

|                                                         |   |
|---------------------------------------------------------|---|
| Maximum number of outstanding asynchronous transactions | 1 |
|---------------------------------------------------------|---|

#### 4.2.6.2.4 Implementation Identifying Information

The implementation information for this Application Entity is:

**Table 4.2-49**  
**DICOM IMPLEMENTATION CLASS AND VERSION FOR THE MPPS SCU AE**

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Implementation Class UID    | 1.2.392.200036.9116.6.28.1000.1 (CUS-AA550)<br>1.2.392.200036.9116.6.29.1000.1 (CUS-AA450)<br>1.2.392.200036.9116.6.33.1000.1 (CUS-AA000) |
| Implementation Version Name | CM_UL_DCM_V1.0<br>for Original<br>TM_UL_DCM_V1.0<br>for Option                                                                            |

### 4.2.6.3 Association Initiation Policy

#### 4.2.6.3.1 Activity – Acquire Instances

##### 4.2.6.3.1.1 Description and Sequencing of Activities

The MPPS SCU AE performs the creation of an MPPS instance automatically when the user selects and starts a worklist item. Further updates on the MPPS data can be performed when the user completes the acquisition.

The MPPS SCU AE will initiate an association to issue an:

- N-CREATE request according to the CREATE Modality Performed Procedure Step SOP Instance operation, or an:
- N-SET request to update the contents and state of the MPPS according to the SET Modality Performed Procedure Step Information operation.

**Figure 4.2-7**  
**SEQUENCING OF ACTIVITY – ACQUIRE INSTANCES**

A possible sequence of interactions between the MPPS SCU AE and a Department Scheduler (e.g. a device such as a RIS or HIS which supports the MPPS SOP Class as an SCP) is illustrated in the Figure above:

1. The MPPS SCU AE opens an association with the Department Scheduler
2. The MPPS SCU AE sends an N-CREATE request to the Department Scheduler to create an MPPS instance with status of "IN PROGRESS" and create all necessary attributes. The Department Scheduler acknowledges the MPPS creation with an N-CREATE response (status success).
3. The MPPS SCU AE closes the association with the Department Scheduler.
4. All instances are acquired and stored in the local database.
5. The MPPS SCU AE opens an association with the Department Scheduler.
6. The MPPS SCU AE sends an N-SET request to the Department Scheduler to update the MPPS instance with status of "COMPLETED" and set all necessary attributes. The Department Scheduler acknowledges the MPPS update with an N-SET response (status success).
7. The MPPS SCU AE closes the association with the Department Scheduler.

#### 4.2.6.3.1.2 Proposed Presentation Contexts

The MPPS SCU AE will propose Presentation Contexts shown in the following table:

**Table 4.2-50**  
**PROPOSED PRESENTATION CONTEXTS FOR REAL-WORLD ACTIVITY ACQUIRE INSTANCES**

| Presentation Context Table        |                         |                           |                     |      |           |
|-----------------------------------|-------------------------|---------------------------|---------------------|------|-----------|
| Abstract Syntax                   |                         | Transfer Syntax           |                     | Role | Ext. Neg. |
| Name                              | UID                     | Name List                 | UID List            |      |           |
| Modality Performed Procedure Step | 1.2.840.10008.3.1.2.3.3 | Implicit VR Little Endian | 1.2.840.10008.1.2   | SCU  | None      |
|                                   |                         | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |      |           |

#### 4.2.6.3.1.3 SOP Specific Conformance for MPPS SOP Class

The MPPS SCU AE provides standard conformance to the Modality Performed Procedure Step SOP Class as an SCU.

The behavior of the MPPS SCU AE when encountering status codes in an MPPS N-CREATE or N-SET response is summarized in the table below.

**Table 4.2-51**  
**MPPS N-CREATE / N-SET RESPONSE STATUS HANDLING BEHAVIOR**

| Service Status | Further Meaning | Status Code           | Behavior                                                                                                            |
|----------------|-----------------|-----------------------|---------------------------------------------------------------------------------------------------------------------|
| Success        | Success         | 0000                  | The SCP has completed the operation successfully.                                                                   |
| *              | *               | Any other status code | The association is aborted and the MPPS is marked as failed. The status meaning is logged and reported to the user. |

The behavior of the MPPS SCU AE during communication failure is summarized in the table below:

**Table 4.2-52**  
**MPPS COMMUNICATION FAILURE BEHAVIOR**

| Exception                                        | Behavior                                                                                                |
|--------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| Timeout                                          | The association is aborted and MPPS is marked as failed. The reason is logged and reported to the user. |
| Association aborted by the SCP or network layers | The MPPS is marked as failed. The reason is logged and reported to the user.                            |

The table below provides a description of the MPPS N-CREATE and N-SET request identifiers sent by the MPPS SCU AE. Empty cells in the N-CREATE and N-SET columns indicate that the attribute is not sent. An "x" indicates that an appropriate value will be sent. A "Zero length" attribute will be sent with zero length.

**Table 4.2-53  
MPPS N-CREATE / N-SET REQUEST IDENTIFIER**

| Attribute Name                               | Tag         | VR | N-CREATE                                                                                           | N-SET                                                                                              |
|----------------------------------------------|-------------|----|----------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|

#### 4.2.6.4 Association Acceptance Policy

The MPPS SCU AE does not accept associations.

## 4.2.7 Q/R SCU AE Specification

### 4.2.7.1 SOP Classes

The Q/R SCU AE provides Standard Conformance to the following SOP Classes:

**Table 4.2-54**  
**SOP CLASSES FOR THE Q/R SCU AE**

| SOP Class Name                          | SOP Class UID               | SCU | SCP |
|-----------------------------------------|-----------------------------|-----|-----|
| Study Root Q/R Information Model – FIND | 1.2.840.10008.5.1.4.1.2.2.1 | Yes | No  |
| Study Root Q/R Information Model – MOVE | 1.2.840.10008.5.1.4.1.2.2.2 |     |     |

### 4.2.7.2 Association Policies

#### 4.2.7.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 4.2-55**  
**DICOM APPLICATION CONTEXT FOR THE Q/R SCU AE**

|                          |                       |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

#### 4.2.7.2.2 Number of Associations

The Q/R SCU AE initiates one association at a time.

**Table 4.2-56**  
**NUMBER OF ASSOCIATIONS INITIATED FOR THE Q/R SCU AE**

|                                             |   |
|---------------------------------------------|---|
| Maximum number of simultaneous associations | 1 |
|---------------------------------------------|---|

#### 4.2.7.2.3 Asynchronous Nature

The Q/R SCU AE does not support asynchronous communication (multiple outstanding transactions over a single association).

**Table 4.2-57**  
**ASYNCHRONOUS NATURE FOR THE Q/R SCU AE**

|                                                         |   |
|---------------------------------------------------------|---|
| Maximum number of outstanding asynchronous transactions | 1 |
|---------------------------------------------------------|---|

#### 4.2.7.2.4 Implementation Identifying Information

The implementation information for this Application Entity is:

**Table 4.2-58**  
**DICOM IMPLEMENTATION CLASS AND VERSION FOR THE Q/R SCU AE**

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Implementation Class UID    | 1.2.392.200036.9116.6.28.1000.1 (CUS-AA550)<br>1.2.392.200036.9116.6.29.1000.1 (CUS-AA450)<br>1.2.392.200036.9116.6.33.1000.1 (CUS-AA000) |
| Implementation Version Name | CM_UL_DCM_V1.0<br>for Original<br>TM_UL_DCM_V1.0<br>for Option                                                                            |

### 4.2.7.3 Association Initiation Policy

#### 4.2.7.3.1 Activity – Query and Retrieve Instances

##### 4.2.7.3.1.1 Description and Sequencing of Activities

The Q/R SCU AE is activated when the user selects a remote node to query and enters some key information, Patient's Name, Patient ID and/or Study Date. The user can select series to be retrieved. The instances will be received at the Storage SCP AE.

**Figure 4.2-8**  
**SEQUENCING OF ACTIVITY – QUERY AND RETRIEVE INSTANCES**

The following sequencing constraints illustrated in the Figure above:

1. The Q/R SCU AE opens an association with the Remote Q/R SCP AE.
2. The Q/R SCU AE sends a C-FIND-RQ Message.
3. The Remote Q/R SCP AE returns a C-FIND-RSP Message to the Q/R SCU AE with matching information. A C-FIND-RSP is sent for each entity matching the identifier specified in the C-FIND-RQ. A final C-FIND-RSP is sent indicating that the matching is complete.
4. The Q/R SCU AE closes the association.
5. The Q/R SCU AE opens an association with the Remote Q/R SCP AE.
6. The Q/R SCU AE sends a C-MOVE-RQ Message. The Remote Q/R SCP AE notifies the Remote Storage SCU AE to send the Composite SOP Instances to the peer C-MOVE Destination AE as indicated in the C-MOVE-RQ.
7. The Remote Storage SCU AE opens an association with the C-MOVE Destination AE.
8. The Remote Storage SCU AE sends instances to the C-MOVE Destination AE. The Remote Storage SCU AE indicates to the Remote Q/R SCP AE whether the transfer succeeded or failed.
9. The Remote Q/R SCP AE then returns a C-MOVE-RSP indicating this success or failure.
10. The Remote Storage SCU AE closes the association.
11. The Q/R SCU AE closes the association.

#### 4.2.7.3.1.2 Proposed Presentation Contexts

The Q/R SCU AE will propose Presentation Contexts shown in the following table:

**Table 4.2-59**  
**PROPOSED PRESENTATION CONTEXTS FOR REAL-WORLD ACTIVITY**  
**QUERY AND RETRIEVE INSTANCES**

| Presentation Context Table              |                             |                           |                     |      |           |
|-----------------------------------------|-----------------------------|---------------------------|---------------------|------|-----------|
| Abstract Syntax                         |                             | Transfer Syntax           |                     | Role | Ext. Neg. |
| Name                                    | UID                         | Name List                 | UID List            |      |           |
| Study Root Q/R Information Model – FIND | 1.2.840.10008.5.1.4.1.2.2.1 | Implicit VR Little Endian | 1.2.840.10008.1.2   | SCU  | None      |
|                                         |                             | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |      |           |
| Study Root Q/R Information Model – MOVE | 1.2.840.10008.5.1.4.1.2.2.2 | Implicit VR Little Endian | 1.2.840.10008.1.2   |      |           |
|                                         |                             | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |      |           |

#### 4.2.7.3.1.3 SOP Specific Conformance for Q/R Find SOP Classes

The Q/R SCU AE provides standard conformance to the Query/Retrieve Find SOP Classes as an SCU.

The behavior of the Q/R SCU AE when encountering status codes in a Q/R C-FIND response is summarized in the table below:

**Table 4.2-60**  
**THE Q/R SCU AE C-FIND RESPONSE STATUS BEHAVIOR**

| Service Status | Further Meaning                                                                    | Status Code           | Behavior                                                                                                                                                                                                                                                        |
|----------------|------------------------------------------------------------------------------------|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Success        | Matching is complete                                                               | 0000                  | The SCP has completed the matches. Study or Series information items are available for display or further processing.                                                                                                                                           |
| Refused        | Out of Resources                                                                   | A700                  | The Association is aborted using A-ABORT and the Study, Series, or Image information query is marked as failed. The status meaning is logged and reported to the user if an interactive query. Any additional error information in the Response will be logged. |
| Failed         | Identifier does not match SOP Class                                                | A900                  |                                                                                                                                                                                                                                                                 |
| Failed         | Unable to Process                                                                  | Cxxx                  |                                                                                                                                                                                                                                                                 |
| Cancel         | Matching terminated due to Cancel request                                          | FE00                  | The Association is aborted using A-ABORT and the Study, Series, or Image information query is marked as failed. The status meaning is logged and reported to the user if an interactive query.                                                                  |
| Pending        | Matches are continuing                                                             | FF00                  | The Study, Series, or Image information items contained in the Identifier is collected for later display or further processing.                                                                                                                                 |
| Pending        | Matches are continuing – Warning that one or more Optional Keys were not supported | FF01                  |                                                                                                                                                                                                                                                                 |
| *              | *                                                                                  | Any other status code | The association is aborted using A-ABORT and the Study or Series information is marked as failed. The status meaning is logged and reported to the user.                                                                                                        |

The behavior of the Q/R SCU AE during communication failure is summarized in the table below.

**Table 4.2-61**  
**Q/R FIND COMMUNICATION FAILURE BEHAVIOR**

| <b>Exception</b>                                 | <b>Behavior</b>                                                                                                              |
|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| Timeout                                          | The association is aborted and the study or series query is marked as failed. The reason is logged and reported to the user. |
| Association aborted by the SCP or network layers | The study or series query is marked as failed. The reason is logged and reported to the user.                                |

All queries are initiated at the highest level of the information model (the STUDY level), and then for each response received, recursively repeated at the next lower levels (the SERIES), in order to completely elucidate the "tree" of instances available on the remote AE.

The table below provides a description of the Q/R SCU AE C-FIND Request Identifier.

**Table 4.2-62**  
**STUDY ROOT REQUEST IDENTIFIER FOR C-FIND**

| Name                               | Tag         | Types of Matching |
|------------------------------------|-------------|-------------------|
| <b>Study Level</b>                 |             |                   |
| Study Date                         | (0008,0020) | S,U,R             |
| Study Time                         | (0008,0030) | U                 |

| Protocol Name                      | (0018,1030) | U                 |
| Series Instance UID                | (0020,000E) | UNIQUE            |
| Series Number                      | (0020,0011) | U                 |
| Number of Series Related Instances | (0020,1209) | U                 |

#### Types of Matching:

The types of Matching supported by the Q/R SCU AE. An "S" indicates the identifier attribute uses Single Value Matching, an "R" indicates Range Matching, an "\*" indicates wildcard matching, and a "U" indicates Universal Matching. "UNIQUE" indicates that this is the Unique Key for that query level, in which case Universal Matching or Single Value Matching is used depending on the query level.

#### 4.2.7.3.1.4 SOP Specific Conformance for Q/R Move SOP Classes

The Q/R SCU AE provides standard conformance to the Query/Retrieve Move SOP Classes as an SCU.

The behavior of the Q/R SCU AE when encountering status codes in a Q/R C-MOVE response is summarized in the table below:

**Table 4.2-63**  
**THE Q/R SCU AE C-MOVE RESPONSE STATUS BEHAVIOR**

| Service Status | Further Meaning                                          | Status Code           | Behavior                                                                                                                                                                                                              |
|----------------|----------------------------------------------------------|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Success        | Sub-operations complete – No Failures                    | 0000                  | The Storage SCP AE has successfully received the SOP Instance. If all SOP Instances in a move job have status success then the job is marked as complete.                                                             |
| Refused        | Out of Resources – Unable to calculate number of matches | A701                  | The Association is aborted using A-ABORT and the move job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application. This is a transient failure. |
|                | Out of Resources – Unable to perform sub-operations      | A702                  |                                                                                                                                                                                                                       |
|                | Move destination unknown                                 | A801                  |                                                                                                                                                                                                                       |

| Pending        | Current Match is supplied. Sub-operations are continuing | FF00                  | The Association continues and the concurrent progress is reported to user with the value of (0000,1020), (0000,1021), (0000,1022) and (0000,1023).                                                                    |
| Refused        | Out of Resources – Unable to calculate number of matches | A701                  | The Association is aborted using A-ABORT and the move job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application. This is a transient failure. |
| *              | *                                                        | Any other status code | The association is aborted using A-ABORT and the move job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application.                              |

The behavior of the Q/R SCU AE during communication failure is summarized in the table below.

**Table 4.2-64**  
**Q/R MOVE COMMUNICATION FAILURE BEHAVIOR**

| <b>Exception</b>                                 | <b>Behavior</b>                                                                                                                                       |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| Timeout                                          | The association is aborted using A-ABORT and the retrieve is marked as failed. The reason is logged and reported to the user if an interactive query. |
| Association aborted by the SCP or network layers | The retrieve is marked as failed. The reason is logged and reported to the user if an interactive query.                                              |

#### **4.2.7.4 Association Acceptance Policy**

The Q/R SCU AE does not accept associations.

## 4.2.8 Storage SCP AE Specification

### 4.2.8.1 SOP Classes

The Storage SCP AE provides Standard Conformance to the following SOP Classes:

**Table 4.2-65**  
**SOP CLASSES FOR THE STORAGE SCP AE**

| SOP Class Name                                             | SOP Class UID                 | SCU | SCP |
|------------------------------------------------------------|-------------------------------|-----|-----|
| Secondary Capture Image Storage                            | 1.2.840.10008.5.1.4.1.1.7     | No  | Yes |
| Ultrasound Image Storage                                   | 1.2.840.10008.5.1.4.1.1.6.1   |     |     |
| Ultrasound Multi-frame Image Storage                       | 1.2.840.10008.5.1.4.1.1.3.1   |     |     |
| Enhanced SR Storage                                        | 1.2.840.10008.5.1.4.1.1.88.22 |     |     |
| Comprehensive SR Storage                                   | 1.2.840.10008.5.1.4.1.1.88.33 |     |     |
| CT Image Storage                                           | 1.2.840.10008.5.1.4.1.1.2     |     |     |
| MR Image Storage                                           | 1.2.840.10008.5.1.4.1.1.4     |     |     |
| Digital Mammography X-Ray Image Storage - For Presentation | 1.2.840.10008.5.1.4.1.1.1.2   |     |     |
| Digital Mammography X-Ray Image Storage - For Processing   | 1.2.840.10008.5.1.4.1.1.1.2.1 |     |     |
| Positron Emission Tomography Image Storage                 | 1.2.840.10008.5.1.4.1.1.128   |     |     |

### 4.2.8.2 Association Policies

#### 4.2.8.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 4.2-66**  
**DICOM APPLICATION CONTEXT FOR THE STORAGE SCP AE**

|                          |                       |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

#### 4.2.8.2.2 Number of Associations

The Storage SCP AE can support up to ten associations at a time.

**Table 4.2-67**  
**NUMBER OF ASSOCIATIONS ACCEPTED FOR THE STORAGE SCP AE**

|                                             |    |
|---------------------------------------------|----|
| Maximum number of simultaneous associations | 10 |
|---------------------------------------------|----|

#### 4.2.8.2.3 Asynchronous Nature

The Storage SCP AE does not support asynchronous communication (multiple outstanding transactions over a single association).

**Table 4.2-68**  
**ASYNCHRONOUS NATURE FOR THE STORAGE SCP AE**

|                                                         |   |
|---------------------------------------------------------|---|
| Maximum number of outstanding asynchronous transactions | 1 |
|---------------------------------------------------------|---|

#### 4.2.8.2.4 Implementation Identifying Information

The implementation information for the Storage SCP AE is:

**Table 4.2-69**  
**DICOM IMPLEMENTATION CLASS AND VERSION FOR THE STORAGE SCP AE**

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Implementation Class UID    | 1.2.392.200036.9116.6.28.1000.1 (CUS-AA550)<br>1.2.392.200036.9116.6.29.1000.1 (CUS-AA450)<br>1.2.392.200036.9116.6.33.1000.1 (CUS-AA000) |
| Implementation Version Name | CM_UL_DCM_V1.0<br>for Original<br>TM_UL_DCM_V1.0<br>for Option                                                                            |

### 4.2.8.3 Association Initiation Policy

The Storage SCP AE does not initiate associations.

### 4.2.8.4 Association Acceptance Policy

The Storage SCP AE accepts associations only if they have valid Presentation Contexts. If none of the requested Presentation Contexts are accepted then the association request itself is rejected. It can be configured to only accept associations with certain hosts (using TCP/IP address) and/or AE Titles.

**Figure 4.2-9**  
**SEQUENCING OF ACTIVITY – STORE IMAGES TO THE LOCAL FILE SYSTEM**

A possible sequence of interactions between the Storage SCP AE and a Remote Storage SCU AE is illustrated in the Figure above:

1. The Remote Storage SCU AE opens an association with the Storage SCP AE.
2. The Remote Storage SCU AE sends images to the Storage SCP AE using a storage request (C-STORE) and the Storage SCP AE replies with a C-STORE response (status success).
3. The Remote Storage SCU AE closes the association with the Storage SCP AE.

The Storage SCP AE may reject association attempts as shown in the Table 4.2-14.

**Note:** The user needs to perform QUERY described in 4.2.7.3.1.1 once for activating the Storage SCP AE, otherwise retrieval of instances will be aborted.

#### 4.2.8.4.1.1 Accepted Presentation Contexts

Storage SCP AE prefers compressed and explicit Transfer Syntaxes. If offered a choice of Transfer Syntaxes in a Presentation Context, it will apply the following priority to the choice of Transfer Syntax:

1. JPEG Lossy
2. JPEG Lossless
3. Explicit VR Little Endian
4. Implicit VR Little Endian

This priority is configurable.

Storage SCP AE will accept duplicate Presentation Contexts, that is, if it is offered multiple Presentation Contexts, each of which offers acceptable Transfer Syntaxes, it will accept all Presentation Contexts, applying the same priority for selecting a Transfer Syntax for each.

Any of the presentation contexts shown in the following table are acceptable to the Storage SCP AE.

**Table 4.2-70**  
**ACCEPTED PRESENTATION CONTEXTS BY THE STORAGE SCP AE**

| Presentation Context Table           |                               |                             |                        |      |           |
|--------------------------------------|-------------------------------|-----------------------------|------------------------|------|-----------|
| Abstract Syntax                      |                               | Transfer Syntax             |                        | Role | Ext. Neg. |
| Name                                 | UID                           | Name List                   | UID List               |      |           |
| Secondary Capture Image Storage      | 1.2.840.10008.5.1.4.1.1.7     | Implicit VR Little Endian   | 1.2.840.10008.1.2      | SCP  | None      |
|                                      |                               | Explicit VR Little Endian   | 1.2.840.10008.1.2.1    |      |           |
|                                      |                               | JPEG Lossy <sup>*1</sup>    | 1.2.840.10008.1.2.4.50 |      |           |
|                                      |                               | JPEG Lossless <sup>*2</sup> | 1.2.840.10008.1.2.4.70 |      |           |
|                                      |                               | RLE Lossless                | 1.2.840.10008.1.2.5    |      |           |

#### 4.2.8.4.1.2 SOP Specific Conformance for Storage SOP Class

The associated Activity with the Storage service is the storage of medical data received over the network on a designated hard disk. The Storage SCP AE will return a failure status if it is unable to store the instances on to the hard disk.

The Storage SCP AE is Level 0 conformant as a Storage SCP.

**Table 4.2-71**  
**THE STORAGE SCP AE C-STORE RESPONSE STATUS RETURN REASONS**

| Service Status | Further Meaning                   | Status Code | Reason                                                                                             |
|----------------|-----------------------------------|-------------|----------------------------------------------------------------------------------------------------|
| Success        | Success                           | 0000        | The Composite SOP Instance was successfully received, verified, and stored in the system database. |
| Refused        | Out of Resources                  | A7xx        | Indicates that there were not enough local resources.                                              |
| Error          | Data Set does not match SOP Class | A9xx        | Indicates that the Data Set does not encode a valid instance of the SOP Class specified.           |
|                | Processing Failed                 | B006        | Indicates that some elements discarded.                                                            |
|                | Processing failed                 | B007        | Indicates that the Data Set does not match a supported SOP Class.                                  |
|                | Cannot Understand                 | C0xx        | Indicates that the Storage SCP AE cannot parse the Data Set into Elements.                         |

## 4.2.9 Print SCU AE Specification

### 4.2.9.1 SOP Classes

The Print SCU AE provides Standard Conformance to the following Meta SOP Classes:

**Table 4.2-72**  
**META SOP CLASSES FOR THE PRINT SCU AE**

| SOP Class Name                        | SOP Class UID          | SCU | SCP |
|---------------------------------------|------------------------|-----|-----|
| Basic Grayscale Print Management Meta | 1.2.840.10008.5.1.1.9  | Yes | No  |
| Basic Color Print Management Meta     | 1.2.840.10008.5.1.1.18 | Yes | No  |

The above Meta SOP Classes are defined by the following set of supported SOP Classes:

**Table 4.2-73**  
**SOP CLASSES FOR THE PRINT SCU AE**

| SOP Class Name                      | SOP Class UID           | SCU | SCP |
|-------------------------------------|-------------------------|-----|-----|
| Basic Film Session SOP Class        | 1.2.840.10008.5.1.1.1   | Yes | No  |
| Basic film Box SOP Class            | 1.2.840.10008.5.1.1.2   | Yes | No  |
| Basic Grayscale Image Box SOP Class | 1.2.840.10008.5.1.1.4   | Yes | No  |
| Basic Color Image Box SOP Class     | 1.2.840.10008.5.1.1.4.1 | Yes | No  |
| Printer SOP Class                   | 1.2.840.10008.5.1.1.16  | Yes | No  |

### 4.2.9.2 Association Policies

#### 4.2.9.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 4.2-74**  
**DICOM APPLICATION CONTEXT FOR THE PRINT SCU AE**

|                          |                       |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

#### 4.2.9.2.2 Number of Associations

The Print SCU AE initiates one association at a time.

**Table 4.2-75**  
**NUMBER OF ASSOCIATIONS ACCEPTED FOR THE PRINT SCU AE**

|                                             |   |
|---------------------------------------------|---|
| Maximum number of simultaneous Associations | 1 |
|---------------------------------------------|---|

#### 4.2.9.2.3 Asynchronous Nature

The Print SCU AE does not support asynchronous communication (multiple outstanding transactions over a single Association).

**Table 4.2-76**  
**ASYNCHRONOUS NATURE FOR THE PRINT SCU AE**

|                                                         |   |
|---------------------------------------------------------|---|
| Maximum number of outstanding asynchronous transactions | 1 |
|---------------------------------------------------------|---|

#### 4.2.9.2.4 Implementation Identifying Information

The implementation information for the Print SCU AE is:

**Table 4.2-77**  
**DICOM IMPLEMENTATION CLASS AND VERSION FOR THE PRINT SCU AE**

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Implementation Class UID    | 1.2.392.200036.9116.6.28.1000.1 (CUS-AA550)<br>1.2.392.200036.9116.6.29.1000.1 (CUS-AA450)<br>1.2.392.200036.9116.6.33.1000.1 (CUS-AA000) |
| Implementation Version Name | CM_UL_DCM_V1.0<br>for Original<br>TM_UL_DCM_V1.0<br>for Option                                                                            |

### 4.2.9.3 Association Initiation Policy

#### 4.2.9.3.1 Activity – Send Images & Print Management Information

##### 4.2.9.3.1.1 Description and Sequencing of Activities

A user composes images onto film sheets and requests them to be sent to a specific hardcopy device. The user can select the desired film format and number of copies.

**Figure 4.2-10**  
**SEQUENCING OF ACTIVITY – SEND IMAGES & PRINT MANAGEMENT INFORMATION**

A typical sequence of DIMSE messages sent over an association between the Print SCU AE and a Printer is illustrated in the Figure above:

1. The Print SCU AE opens an Association with the Printer.
2. N-GET on the Printer SOP Class is used to obtain current printer status information.
3. N-CREATE on the Film Session SOP Class creates a Film Session.
4. N-CREATE on the Film Box SOP Class creates a Film Box linked to the Film Session.
5. N-SET on the Image Box SOP Class transfers the contents of the film sheet to the printer.
6. N-ACTION on the Film Box SOP Class instructs the Printer to print the Film Box.
7. The Printer prints the requested number of film sheets.
8. The Printer asynchronously reports its status via N-EVENT-REPORT notification (Printer SOP Class). The printer can send this message at any time. The Print SCU AE does not require the N-EVENT-REPORT to be sent. The Print SCU AE is capable of receiving an N-EVENT-REPORT notification at any time during an association.
9. N-DELETE on the Film Session SOP Class deletes the complete Film Session SOP Instance hierarchy.
10. The Print SCU AE closes the Association with the Printer.

#### 4.2.9.3.1.2 Proposed Presentation Contexts

The Print SCU AE is capable of proposing the Presentation Contexts shown in the table below:

**Table 4.2-78**  
**PROPOSED PRESENTATION CONTEXTS FOR ACTIVITY SEND IMAGES & PRINT MANAGEMENT INFORMATION**

| Presentation Context Table            |                        |                           |                     |      |           |
|---------------------------------------|------------------------|---------------------------|---------------------|------|-----------|
| Abstract Syntax                       |                        | Transfer Syntax           |                     | Role | Ext. Neg. |
| Name                                  | UID                    | Name List                 | UID List            |      |           |
| Basic Grayscale Print Management Meta | 1.2.840.10008.5.1.1.9  | Implicit VR Little Endian | 1.2.840.10008.1.2   | SCU  | None      |
|                                       |                        | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |      |           |
| Basic Color Print Management Meta     | 1.2.840.10008.5.1.1.18 | Implicit VR Little Endian | 1.2.840.10008.1.2   | SCU  | None      |
|                                       |                        | Explicit VR Little Endian | 1.2.840.10008.1.2.1 |      |           |

#### 4.2.9.3.1.3 Common SOP Specific Conformance for all Print SOP Classes

The general behavior of the Print SCU AE during communication failure is summarized in the table below. This behavior is common for all SOP Classes supported by the Print SCU AE.

**Table 4.2-79**  
**PRINT COMMUNICATION FAILURE BEHAVIOR**

| Exception                                        | Behavior                                                                                                                                                                          |
|--------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Timeout                                          | The Association is aborted using A-ABORT and the print-job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application. |
| Association aborted by the SCP or network layers | The print-job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application.                                              |

#### 4.2.9.3.1.4 SOP Specific Conformance for Printer SOP Class

The Print SCU AE supports the following DIMSE operations and notifications for the Printer SOP Class:

- N-GET
- N-EVENT-REPORT

Details of the supported attributes and status handling behavior are described in the following subsections.

##### 4.2.9.3.1.4.1 Printer SOP Class Operations (N-GET)

The Print SCU AE uses the Printer SOP Class N-GET operation to obtain information about the current printer status. The attributes obtained via N-GET are listed in the table below:

**Table 4.2-80**  
**PRINTER SOP CLASS N-GET REQUEST ATTRIBUTES**

| Attribute Name      | Tag         | VR | Value               | Presence of Value | Source  |
|---------------------|-------------|----|---------------------|-------------------|---------|
| Printer Status      | (2110,0010) | CS | Provided by Printer | ALWAYS            | Printer |
| Printer Status Info | (2110,0020) | CS | Provided by Printer | ALWAYS            | Printer |

The Printer Status information is evaluated as follows:

1. If Printer status (2110,0010) is NORMAL, the print-job continues to be printed.
2. If Printer status (2110,0010) is FAILURE, the print-job is marked as failed. The contents of Printer Status Info (2110,0020) is logged and reported to the user via the job control application.
3. If Printer status (2110,0010) is WARNING, the print-job continues to be printed. The contents of Printer Status Info (2110,0020) is logged and reported to the user via the job control application.

The behavior of The Print SCU AE when encountering status codes in an N-GET response is summarized in the table below:

**Table 4.2-81**  
**PRINTER SOP CLASS N-GET RESPONSE STATUS HANDLING BEHAVIOR**

| Service Status | Further Meaning | Status Code            | Behavior                                                                                                                               |
|----------------|-----------------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success        | Success         | 0000                   | The request to get printer status information was success.                                                                             |
| *              | *               | Any other status code. | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

**4.2.9.3.1.4.2 Printer SOP Class Notifications (N-EVENT-REPORT)**

The Print SCU AE is capable of receiving an N-EVENT-REPORT request at any time during an association.

The behavior of The Print SCU AE when receiving Event Types within the N-EVENT-REPORT is summarized in the table below:

**Table 4.2-82  
PRINTER SOP CLASS N-EVENT-REPORT BEHAVIOUR**

| <b>Event Type Name</b> | <b>Event Type ID</b> | <b>Behavior</b>                                                                                                                                            |
|------------------------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Normal                 | 1                    | The print-job continues to be printed.                                                                                                                     |
| Warning                | 2                    | The print-job continues to be printed. The contents of Printer Status Info (2110,0020) is logged and reported to the user via the job-control application. |
| Failure                | 3                    | The print-job is marked as failed. The contents of Printer Status Info (2110,0020) is logged and reported to the user via the job-control application.     |
| *                      | *                    | An invalid Event Type ID will cause a status code of 0113H to be returned in an N-EVENT-REPORT response.                                                   |

The reasons for returning specific status codes in an N-EVENT-REPORT response are summarized in the table below:

**Table 4.2-83  
PRINTER SOP CLASS N-EVENT-REPORT RESPONSE STATUS REASONS**

| <b>Service Status</b> | <b>Further Meaning</b> | <b>Status Code</b> | <b>Reasons</b>                                                                                                                                      |
|-----------------------|------------------------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Success               | Success                | 0000               | The notification event has been successfully received.                                                                                              |
| Failure               | No Such Event Type     | 0113               | An invalid Event Type ID was supplied in the N-EVENT-REPORT request.                                                                                |
| Failure               | Processing Failure     | 0110               | An internal error occurred during processing of the N-EVENT-REPORT. A short description of the error will be returned in Error Comment (0000,0902). |

#### 4.2.9.3.1.5 SOP Specific Conformance for the Film Session SOP Class

The Print SCU AE supports the following DIMSE operations for the Film Session SOP Class:

- N-CREATE
- N-DELETE

Details of the supported attributes and status handling behavior are described in the following subsections.

##### 4.2.9.3.1.5.1 Film Session SOP Class Operations (N-CREATE)

The attributes supplied in an N-CREATE Request are listed in the table below:

**Table 4.2-84**  
**FILM SESSION SOP CLASS N-CREATE REQUEST ATTRIBUTES**

| Attribute Name   | Tag         | VR | Value                          | Presence of Value | Source |
|------------------|-------------|----|--------------------------------|-------------------|--------|
| Number of Copies | (2000,0010) | IS | 1.. 9                          | ALWAYS            | USER   |
| Print Priority   | (2000,0020) | CS | MED                            | ALWAYS            | AUTO   |
| Medium Type      | (2000,0030) | CS | BLUE FILM, CLEAR FILM or PAPER | ALWAYS            | USER   |
| Film Destination | (2000,0040) | CS | MAGAZINE or PROCESSOR          | ALWAYS            | USER   |

The behavior of The Print SCU AE when encountering status codes in an N-CREATE response is summarized in the table below:

**Table 4.2-85**  
**FILM SESSION SOP CLASS N-CREATE RESPONSE STATUS HANDLING BEHAVIOR**

| Service Status | Further Meaning              | Status Code            | Behavior                                                                                                                               |
|----------------|------------------------------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success        | Success                      | 0000                   | The SCP has completed the operation successfully.                                                                                      |
| Warning        | Attribute Value Out of Range | 0116                   | The N-CREATE operation is considered successful if it is configured that the status would be considered successful.                    |
| Warning        | Attribute List Error         | 0107                   |                                                                                                                                        |
| *              | *                            | Any other status code. | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

##### 4.2.9.3.1.5.2 Film Session SOP Class Operations (N-DELETE)

The behavior of The Print SCU AE when encountering status codes in an N-DELETE response is summarized in the table below:

**Table 4.2-86**  
**PRINTER SOP CLASS N-DELETE RESPONSE STATUS HANDLING BEHAVIOR**

| Service Status | Further Meaning | Status Code            | Behavior                                                                                                                               |
|----------------|-----------------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success        | Success         | 0000                   | The SCP has completed the operation successfully.                                                                                      |
| *              | *               | Any other status code. | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

#### 4.2.9.3.1.6 SOP Specific Conformance for the Film Box SOP Class

The Print SCU AE supports the following DIMSE operations for the Film Box SOP Class:

- N-CREATE
- N-ACTION

Details of the supported attributes and status handling behavior are described in the following subsections.

##### 4.2.9.3.1.6.1 Film Box SOP Class Operations (N-CREATE)

The attributes supplied in an N-CREATE Request are listed in the table below:

**Table 4.2-87**  
**FILM BOX SOP CLASS N-CREATE REQUEST ATTRIBUTES**

| Attribute Name                   | Tag         | VR | Value                                                                                                                  | Presence of Value | Source |

The behavior of the Print SCU AE when encountering status codes in an N-CREATE response is summarized in the table below:

**Table 4.2-88**  
**FILM BOX SOP CLASS N-CREATE RESPONSE STATUS HANDLING BEHAVIOR**

| <b>Service Status</b> | <b>Further Meaning</b>                                                    | <b>Status Code</b>     | <b>Behavior</b>                                                                                                                        |
|-----------------------|---------------------------------------------------------------------------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success               | Success                                                                   | 0000                   | The SCP has completed the operation successfully.                                                                                      |
| Warning               | Requested Min Density or Max Density outside of printer's operating range | B605                   | The N-CREATE operation is considered successful if it is configured that the status would be considered successful.                    |
| *                     | *                                                                         | Any other status code. | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

#### **4.2.9.3.1.6.2 Film Box SOP Class Operations (N-ACTION)**

An N-ACTION Request is issued to instruct the Print SCP to print the contents of the Film Box. The Action Reply argument in an N-ACTION response is not evaluated.

The behavior of The Print SCU AE when encountering status codes in a N-ACTION response is summarized in the table below:

**Table 4.2-89**  
**FILM BOX SOP CLASS N-ACTION RESPONSE STATUS HANDLING BEHAVIOR**

| <b>Service Status</b> | <b>Further Meaning</b>                                                                                                              | <b>Status Code</b>     | <b>Behavior</b>                                                                                                                        |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success               | Success                                                                                                                             | 0000                   | The SCP has completed the operation successfully. The film has been accepted for printing.                                             |
| Warning               | Film Box SOP Instance hierarchy does not contain Image Box SOP Instances (empty page)                                               | B603                   | The N-ACTION operation is considered successful if it is configured that the status would be considered successful.                    |
| Warning               | Image size is larger than Image Box size. The image has been demagnified.                                                           | B604                   |                                                                                                                                        |
| Warning               | Image size is larger than Image Box size. The image has been cropped to fit.                                                        | B609                   |                                                                                                                                        |
| Warning               | Image size or Combined Print Image Size is larger than Image Box size. The image or combined Print Image has been decimated to fit. | B60A                   |                                                                                                                                        |
| Failure               | Unable to create Print Job SOP Instance; print queue is full.                                                                       | C602                   | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |
| Failure               | Image size is larger than Image Box size.                                                                                           | C603                   |                                                                                                                                        |
| Failure               | Combined Print Image Size is larger than Image Box size.                                                                            | C613                   |                                                                                                                                        |
| *                     | *                                                                                                                                   | Any other status code. |                                                                                                                                        |

#### 4.2.9.3.1.7 SOP Specific Conformance for the Grayscale Image Box SOP Class

The Print SCU AE supports the following DIMSE operations for the Grayscale Image Box SOP Class:

— N-SET

Details of the supported attributes and status handling behavior are described in the following subsections.

##### 4.2.9.3.1.7.1 Grayscale Image Box SOP Class Operations (N-SET)

The attributes supplied in an N-SET Request are listed in the table below:

**Table 4.2-90**  
**GRAYSCALE IMAGE BOX SOP CLASS N-SET REQUEST ATTRIBUTES**

| Attribute Name                 | Tag         | VR | Value                              | Presence of Value | Source |
|--------------------------------|-------------|----|------------------------------------|-------------------|--------|
| Image Position                 | (2020,0010) | US | 1                                  | ALWAYS            | AUTO   |

| >High Bit                      | (0028,0102) | US | 7                                  | ALWAYS            | AUTO   |
| >Pixel Representation          | (0028,0103) | US | 0                                  | ALWAYS            | AUTO   |
| >Pixel Data                    | (7FE0,0010) | OB |                                    | ALWAYS            | AUTO   |

The behavior of the Print SCU AE when encountering status codes in an N-SET response is summarized in the table below:

Table 4.2-91

**GRAYSCALE / COLOR IMAGE BOX SOP CLASS N-SET RESPONSE STATUS HANDLING BEHAVIOR**

| <b>Service Status</b> | <b>Further Meaning</b>                                                                                                              | <b>Status Code</b>     | <b>Behavior</b>                                                                                                                        |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success               | Success                                                                                                                             | 0000                   | The SCP has completed the operation successfully. Image successfully stored in Image Box.                                              |
| Warning               | Image size is larger than Image Box size. The image has been demagnified.                                                           | B604                   | The N-SET operation is considered successful if it is configured that the status would be considered successful.                       |
| Warning               | Requested Min Density or Max Density outside of printer's operating range.                                                          | B605                   |                                                                                                                                        |
| Warning               | Image size is larger than Image Box size. The image has been cropped to fit.                                                        | B609                   |                                                                                                                                        |
| Warning               | Image size or Combined Print Image Size is larger than Image Box size. The image or combined Print Image has been decimated to fit. | B60A                   |                                                                                                                                        |
| Failure               | Image size is larger than Image Box size.                                                                                           | C603                   | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |
| Failure               | Insufficient memory in printer to store the image.                                                                                  | C605                   |                                                                                                                                        |
| Failure               | Combined Print Image Size is larger than Image Box size.                                                                            | C613                   |                                                                                                                                        |
| *                     | *                                                                                                                                   | Any other status code. |                                                                                                                                        |

#### 4.2.9.3.1.8 SOP Specific Conformance for the Color Image Box SOP Class

The Print SCU AE supports the following DIMSE operations for the Color Image Box SOP Class:

— N-SET

Details of the supported attributes and status handling behavior are described in the following subsections.

##### 4.2.9.3.1.8.1 Color Image Box SOP Class Operations (N-SET)

The attributes supplied in an N-SET Request are listed in the table below:

**Table 4.2-92**  
**COLOR IMAGE BOX SOP CLASS N-SET REQUEST ATTRIBUTES**

| Attribute Name                 | Tag         | VR | Value                              | Presence of Value | Source |
|--------------------------------|-------------|----|------------------------------------|-------------------|--------|
| Image Position                 | (2020,0010) | US | 1                                  | ALWAYS            | AUTO   |
| Magnification Type             | (2010,0060) | CS | REPLICATE, BILINEAR, CUBIC or NONE | ALWAYS            | USER   |
| Smoothing Type                 | (2010,0080) | CS |                                    | ANAP              | USER   |
| Basic Grayscale Image Sequence | (2020,0110) | SQ |                                    | ALWAYS            | AUTO   |
| >Samples Per Pixel             | (0028,0002) | US | 3                                  | ALWAYS            | AUTO   |
| >Photometric Interpretation    | (0028,0004) | CS | RGB                                | ALWAYS            | AUTO   |
| >Planar Configuration          | (0028,0006) | US | 0x0001                             | ALWAYS            | AUTO   |
| >Rows                          | (0028,0010) | US |                                    | ALWAYS            | AUTO   |
| >Columns                       | (0028,0011) | US |                                    | ALWAYS            | AUTO   |
| >Bits Allocated                | (0028,0100) | US | 8                                  | ALWAYS            | AUTO   |
| >Bits Stored                   | (0028,0101) | US | 8                                  | ALWAYS            | AUTO   |
| >High Bit                      | (0028,0102) | US | 7                                  | ALWAYS            | AUTO   |
| >Pixel Representation          | (0028,0103) | US | 0                                  | ALWAYS            | AUTO   |
| >Pixel Data                    | (7FE0,0010) | OB |                                    | ALWAYS            | AUTO   |

The behavior of the Print SCU AE when encountering status codes in an N-SET response is summarized in Table 4.2-91.

#### 4.2.9.4 Association Acceptance Policy

The Print SCU AE does not accept associations.

## 4.3 NETWORK INTERFACES

### 4.3.1 Physical Network Interface

This product supports wired and wireless network interfaces as follows:

**Table 4.3-1**  
**SUPPORTED PHYSICAL NETWORK INTERFACES**

|                                         |
|-----------------------------------------|
| Ethernet 10BASE-T/100BASE-TX/1000BASE-T |
| IEEE 802.11b/a/g/n/ac (option)          |

Each of the network adapters works exclusively, and thus the user must select either WIRED or WIRELESS.

### 4.3.2 Additional Protocols

DHCP can not be used to obtain TCP/IP network configuration information (e.g., own IP address, subnet mask, default gateway, DNS server, etc).

DNS can be used for address resolution.

NTP can be used to synchronize the system clock with a time server.

WPA2-Personal can be used for wireless network security in conjunction with a pre-shared key.

WPA2-Enterprise can be used for wireless network security in conjunction with an authentication server.

Notes: DHCP can not be used to obtain TCP/IP network configuration information (e.g., own IP address, subnet mask, default gateway, DNS server, etc).

### 4.3.3 IPv4 and IPv6 Support

This product only supports IPv4 connections.

## 4.4 CONFIGURATION

### 4.4.1 AE Title/Presentation Address Mapping

#### 4.4.1.1 Local AE Titles

All local applications use the AE Titles and TCP/IP Ports configured via the service tool.

**Table 4.4-1**  
**AE TITLE CONFIGURATION TABLE**

| Application Entity     | Default AE Title | Default TCP/IP Port |
|------------------------|------------------|---------------------|
| MWM SCU                | MWMSCU_AE        | Not Applicable      |
| MPPS SCU               | MPPSSCU_AE       |                     |
| Print SCU              | PrintSCU_AE      |                     |
| Verification SCU       | VERIFY_AETITLE   |                     |
| Storage SCU            | DICOM_LOCAL_SCU  |                     |
| Query/Retrieve SCU     |                  |                     |
| Storage Commitment SCU |                  |                     |
| Storage SCP            | DICOM_LOCAL_SCP  | 104                 |
| Verification SCP       |                  |                     |

**Table 4.4-2**  
**AE TITLE CONFIGURATION TABLE FOR SECURE COMMUNICATION MODE**

| AE TITLE CONFIGURATION TABLE FOR SECURE COMMUNICATION MODE |                  |                     |
|------------------------------------------------------------|------------------|---------------------|
| Application Entity                                         | Default AE Title | Default TCP/IP Port |
| MWM SCU                                                    | MWMSCU_AE        | Not Applicable      |
| MPPS SCU                                                   | MPPSSCU_AE       |                     |
| Verification SCU                                           | VERIFY_AETITLE   |                     |
| Storage SCU                                                | DICOM_LOCAL_SCU  |                     |
| Query/Retrieve SCU                                         |                  |                     |
| Storage Commitment SCU                                     |                  | 2762                |
| Storage SCP                                                | DCM_SECURE_LOCAL |                     |
| Verification SCP                                           |                  |                     |

The default character repertoire excluding the highlighted characters can be used for the AE Titles:

**Table 4.4-3**  
**AE TITLE CHARACTER REPERTOIRE**

|      | 0  | 1 | 2 | 3 | 4  | 5 | 6 | 7 | 8 | 9 | A  | B   | C  | D  | E | F |

#### **4.4.1.2 Remote AE Title/Presentation Address Mapping**

The AE Title, host name, port number and secured connection of each remote applications are configured using the service tool. The character repertoire of the AE Titles is listed in Table 4.4-3.

#### 4.4.2 Parameters

A large number of parameters related to acquisition and general operation can be configured using the service tool. The table below only shows those configuration parameters relevant to DICOM communication. See the Product's Service Manual for details on general configuration capabilities.

**Table 4.4-4  
CONFIGURATION PARAMETERS TABLE**

| Parameter                                                                                                                                   | Configurable<br>(Yes/No)<br>[Range]                        | Default Value                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|-----------------------------------------------------|
| <b>General Parameters</b>                                                                                                                   |                                                            |                                                     |
| Maximum PDU send/receive size                                                                                                               | Yes<br>[2048-1048576]                                      | 32768 bytes                                         |
| Time-out waiting for an acceptance or rejection response to an association request (Application Level Timeout)                              | Yes<br>[1-9999999]                                         | 30 sec                                              |
| Time-out waiting for a response to an association release request (Application Level Timeout)                                               | Yes<br>[1-9999999]                                         | 30 sec                                              |
| Time-out waiting for completion of a TCP/IP connect request (Low-level timeout)                                                             | Yes<br>[1-9999999]                                         | 30 sec                                              |
| Time-out awaiting a response to a DIMSE request (Low-Level Timeout)                                                                         | Yes<br>[1-9999999]                                         | 30 sec                                              |
| Time-out for waiting for data between TCP/IP-packets (Low Level Timeout)                                                                    | Yes<br>[1-9999999]                                         | 30 sec                                              |
| <b>Storage SCU Parameters</b>                                                                                                               |                                                            |                                                     |
| Maximum number of simultaneously initiated associations by the Storage SCU AE                                                               | No                                                         | 10                                                  |
| Number of times a failed send job may be retried                                                                                            | No                                                         | Forever, until the job succeeds or user cancels it. |
| <b>Storage Commitment SCU Parameters</b>                                                                                                    |                                                            |                                                     |
| Maximum number of simultaneously initiated associations by the Storage Commitment SCU AE                                                    | No                                                         | 10                                                  |

## 5. MEDIA INTERCHANGE

### 5.1 IMPLEMENTATION MODEL

#### 5.1.1 Application Data Flow

**Figure 5.1-1**

#### APPLICATION DATA FLOW DIAGRAM FOR MEDIA STORAGE

- The Offline-Media AE exports instances to a CD-R, DVD±R or USB Storage medium. It is associated with the local real-world activity "Export Instances" performed upon user request.
- The Offline-Media AE imports instances from a CD-R, DVD±R or USB Storage medium. It is associated with the local real-world activity "Import Instances" performed upon user request.
- The Offline-Media AE updates instances from a USB Storage medium. It is associated with the local real-world activity "Add Instances" performed upon user request.

#### 5.1.2 Functional Definition of AEs

##### 5.1.2.1 Functional Definition of Offline-Media AE

The Offline-Media AE is performed upon user request for selected instances to/from an offline DICOM CD-R, DVD±R or USB medium. It therefore performs the following tasks:

##### Export:

- Builds DICOM Information Objects.
- Creates a DICOmdir file that represents the contents of the DICOM Information Objects to be recorded.
- Records DICOM Information Objects and the DICOmdir file to the CD-R, DVD±R or USB medium.

##### Import:

- Reads the DICOmdir file that represents the contents of the data as recorded.
- Displays the ordered list of instances, identifying information.
- Loads the selected instances from the CD-R, DVD±R or USB medium and displays them on the screen.

##### Addition:

- Reads a File-set of the USB medium and writes it to the local storage device.
- Adds the instances to the File-set, then writes it to the medium.
- Modifies the DICOmdir file.

Note: The Offline-Media AE can update files created by the product itself.

### 5.1.3 Sequencing of Real-World Activities

#### 5.1.3.1 Activity – Export Instances

Operator requests to create new File-set(s) onto a new CD-R, DVD±R or USB medium. The requests are placed in a queue and are executed in the background.

The operations for "Export Instances" are described below:

- Step-1: Select the instances on the local storage device to be created to the medium.
- Step-2: Request to copy to the medium.

#### 5.1.3.2 Activity – Import Instances

Operator requests to retrieve File-set(s) on the CD-R, DVD±R or USB medium. The requests are placed in a queue and are executed in the background.

The operations for "Import Instances" are described below:

- Step-1: Select the instances on the medium to be retrieved to the local storage device.
- Step-2: Request to copy to the local storage device.

#### 5.1.3.3 Activity – Add Instances

Operator requests to add new objects to an already existing File-set on the USB medium. The requests are placed in a queue and are executed in the background.

The operations for "Add Instances" are described below:

- Step-1: Select the instances on the local storage device to be added to the medium.
- Step-2: Request to copy to the medium.

### 5.1.4 File Meta Information for Implementation Class and Version

The implementation information written to the File Meta Header in each file is:

**Table 5.1-1**  
**DICOM IMPLEMENTATION CLASS AND VERSION FOR MEDIA STORAGE**

|                               |                                                                                                                                           |

## 5.2 AE SPECIFICATIONS

### 5.2.1 Offline-Media AE Specification

The Offline-Media AE provides standard conformance to the DICOM Interchange Option of the Media Storage Service Class. The Application Profiles and roles are listed below:

**Table 5.2-1**  
**APPLICATION PROFILES, ACTIVITIES AND ROLES FOR OFFLINE-MEDIA**

| Application Profiles Supported                                  | Real World Activity | Role | SC Option   |
|-----------------------------------------------------------------|---------------------|------|-------------|
| AUG-GEN-CD, STD-GEN-DVD-JPEG, STD-GEN-USB-JPEG                  | Export Instances    | FSC  | Interchange |
| AUG-GEN-CD, STD-GEN-DVD-JPEG, STD-GEN-USB-JPEG, STD-GEN-USB-J2K | Import Instances    | FSR  | Interchange |
| STD-GEN-USB-JPEG                                                | Add Instances       | FSU  | Interchange |

#### 5.2.1.1 File Meta Information for the Application Entity

The Source Application Entity Title is the local AE title of Storage SCP.

#### 5.2.1.2 Real-World Activities

##### 5.2.1.2.1 Activity – Export Instances

The Offline-Media AE acts as an FSC using the interchange option when requested to export SOP Instances from the local database to a CD-R, DVD±R or USB medium.

##### 5.2.1.2.1.1 Media Storage Application Profiles

The Offline-Media AE supports the AUG-GEN-CD, STD-GEN-DVD-JPEG and STD-GEN-USB-JPEG Application Profiles.

##### 5.2.1.2.1.1.1 Options

The Offline-Media AE supports the SOP Classes and Transfer Syntaxes listed in Table 5.2-2.

**Table 5.2-2**  
**IODs, SOP Classes and Transfer Syntaxes for Export Instances and Add Instances**

| Information Object Definition        | SOP Class UID               | Transfer Syntax             | Transfer Syntax UID    |
|--------------------------------------|-----------------------------|-----------------------------|------------------------|

\*1 JPEG Baseline (Process 1)

\*2 JPEG Lossless, Non-Hierarchical, First-Order Prediction (Process 14 [Selection Value 1])

### 5.2.1.2.2 Activity – Import Instances

The Offline-Media AE acts as an FSR using the interchange option when requested to import SOP Instances from a CD-R, DVD±R or USB medium to the local database.

#### 5.2.1.2.2.1 Media Storage Application Profiles

The Offline-Media AE supports the AUG-GEN-CD, STD-GEN-DVD-JPEG, STD-GEN-USB-JPEG and STD-GEN-USB-J2K Application Profiles.

##### 5.2.1.2.2.1.1 Options

The Offline-Media AE supports the SOP Classes and Transfer Syntaxes listed in Table 5.2-3.

**Table 5.2-3**  
**IODs, SOP Classes and Transfer Syntaxes for Import Instances**

| Information Object Definition        | SOP Class UID                 | Transfer Syntax             | Transfer Syntax UID    |
|--------------------------------------|-------------------------------|-----------------------------|------------------------|
| DICOM Media Storage Directory        | 1.2.840.10008.1.3.10          | Explicit VR Little Endian   | 1.2.840.10008.1.2.1    |
| Secondary Capture Image Storage      | 1.2.840.10008.5.1.4.1.1.7     | Explicit VR Little Endian   | 1.2.840.10008.1.2.1    |
|                                      |                               | JPEG Lossy <sup>*1</sup>    | 1.2.840.10008.1.2.4.50 |
|                                      |                               | JPEG Lossless <sup>*2</sup> | 1.2.840.10008.1.2.4.70 |
|                                      |                               | RLE Lossless                | 1.2.840.10008.1.2.5    |

\*1 JPEG Baseline (Process 1)

\*2 JPEG Lossless, Non-Hierarchical, First-OrderPrediction (Process 14 [Selection Value 1])

\*3 JPEG 2000 Image Compression (LosslessOnly)

#### **5.2.1.2.3 Activity – Add Instances**

The Offline-Media AE acts as an FSU using the interchange option when requested to add SOP Instances from the local database to a USB medium.

##### **5.2.1.2.3.1 Media Storage Application Profiles**

The Offline-Media AE supports the STD-GEN-USB-JPEG Application Profiles.

##### **5.2.1.2.3.1.1 Options**

The Offline-Media AE supports the SOP Classes and Transfer Syntaxes listed in Table 5.2-2.

### **5.3 AUGMENTED AND PRIVATE APPLICATION PROFILES**

The Offline-Media AE does not support any augmented and private application profiles.

### **5.4 MEDIA CONFIGURATION**

Not applicable.

## 6. SUPPORT OF CHARACTER SETS

This product supports the following character sets:

- ISO-IR 6 (default)                      ISO 646
- ISO-IR 100 (Latin alphabet No.1)      Supplementary set of ISO 8859
- ISO-IR 101 (Latin alphabet No.2)      Supplementary set of ISO 8859
- ISO-IR 110 (Latin alphabet No.4)      Supplementary set of ISO 8859
- ISO-IR 144 (Cyrillic)                  Supplementary set of ISO 8859
- ISO-IR 87 (Japanese)                  JIS X 0208 (Kanji)

Notes: If the Storage SCP AE receives instances that contain characters from unsupported character sets, it will respond with "Cannot Understand" to the C-STORE request.

If the MWM SCU AE receives worklist items that contain characters from unsupported character sets, it may abort the association using A-ABORT.

This product doesn't support ISO-IR 13 (Kana).

## 7. SECURITY

### 7.1 Introduction

The security section describes security features implemented by this product. It includes description of non-DICOM network protocols, information to configure firewalls and application white-lists, list of supported DICOM security profiles as well as Web Security features. Additionally, secured media storage, VPN, etc are also specified in this security section.

### 7.2 DICOM Security Profile Availability

#### 7.2.1 Secure Use and User Identity Profiles

This product supports the following requirements for the security auditing and audit trail in conformance with Audit Trail Message Format Profile. At the default configuration, the audit trail is stored in the product local store.

**Table 7.2-1: Secure Use and User Identity Profiles**

| Profile                                               | Creator/Sender | Consumer/Receiver | Reference |
|-------------------------------------------------------|----------------|-------------------|-----------|
| Audit Trail Message Format                            | Y              | N                 | 8.8.1     |
| Audit Trail Message Transmission Profile - SYSLOG-TLS | Y              | N                 | 8.8.1     |
| Audit Trail Message Transmission Profile - SYSLOG-UDP | Y              | N                 | 8.8.1     |

#### 7.2.2 Secure Transport Connection Profiles

This product supports the following requirements for the secure DICOM communication. At the default configuration, the TLS option is deactivated. When the TLS option is activated, the Default is BCP195 TLS Secure Transport Connection (TLS 1.2) with FIPS authentication.

**Table 7.2-2: Secure Transport Connection Profiles**

| Profile                                                                 | Sender | Receiver | Reference |
|-------------------------------------------------------------------------|--------|----------|-----------|
| BCP 195 RFC 8996, 9325 TLS Secure Transport Connection Profile          | Y      | Y        | 8.8.2     |
| Modified BCP 195 RFC 8996, 9325 TLS Secure Transport Connection Profile | Y      | Y        | 8.8.2     |
| Other Cipher Suites                                                     | Y      | Y        | 8.8.2     |

#### 7.2.3 Media Storage Security Profiles

Not applicable to this product.

## 7.2.4 Attribute Confidentiality Profiles

**Table 7.2-3: Attribute Confidentiality Profiles**

| Profile                                 | Option                      | De-identifier | Re-identifier | Configurable |
|-----------------------------------------|-----------------------------|---------------|---------------|--------------|
| Basic Application Level Confidentiality |                             | Y             | N             | N            |
|                                         | Retain Device Identity      | Y             | N             | N            |
|                                         | Retain Institution Identity | Y             | N             | N            |

## 8. ANNEXES

### 8.1 IOD CONTENTS

#### 8.1.1 Created SOP Instances

Table 8.1-1 specifies the attributes of a Secondary Capture Image transmitted by the Storage SCU AE.

Table 8.1-2 specifies the attributes of an Ultrasound Image transmitted by the Storage SCU AE.

Table 8.1-3 specifies the attributes of an Ultrasound Multi-frame Image transmitted by the Storage SCU AE.

Table 8.1-4 specifies the attributes of an Enhanced US Volume transmitted by the Storage SCU AE.

Table 8.1-5 specifies the attributes of an Enhanced SR transmitted by the Storage SCU AE.

Table 8.1-6 specifies the attributes of a Comprehensive SR transmitted by the Storage SCU AE.

The following tables use a number of abbreviations. The abbreviations used in the "Presence of ..." column are:

|             |                                                                              |
|-------------|------------------------------------------------------------------------------|
| VNAP        | Value Not Always Present (attribute sent zero length if no value is present) |
| ANAP        | Attribute Not Always Present                                                 |
| ALWAYS      | Always Present                                                               |
| EMPTY       | Attribute is sent without a value                                            |
| Not Present | All attributes in this module are not present                                |

The abbreviations used in the "Source" column:

|        |                                                                                   |
|--------|-----------------------------------------------------------------------------------|
| MWL    | the attribute value source is Modality Worklist                                   |
| USER   | the attribute value source is from user input                                     |
| AUTO   | the attribute value is generated automatically                                    |
| MPPS   | the attribute value is the same as that use for Modality Performed Procedure Step |
| CONFIG | the attribute value source is a configurable parameter                            |
